Pembangunan Sosial dan Penanggulangan Kemiskinan

Social Development and Poverty Reduction

Paiwan¹
Staff Pengajar Fakultas Ilmu Sosial dan Ilmu Politik Universitas Jember

ABSTRACT
Distortion caused by the construction of economic development, colonization and globalization have failed to eliminate poverty and failed to improve social welfare in all walks of life. Environmental damage not only in the form of physical damage to the environment, but also damages the social environment such as poverty, unemployment, crime, divorce, domestic violence, drug abuse, deprivation of social rights of the community happened everywhere. To overcome the distortion of the alternative development through social development. Social construction of its main characteristic is trying to align social policy with the aim of increasing economic development. Increasing the welfare can be achieved when individuals can achieve their social welfare in accordance with their respective conditions. Poverty reduction and social development are the efforts to empower the community, but it still drawbacks such as low participation.
