

Dalam konteks penawaran saham perdana (*initial public offering*=IPO), underpricing telah menjadi suatu subjek berbagaimana. Underpricing merupakan salah satu dari tiga anomali dalam penawaran saham perdana. Sejumlah teori sudah dijelaskan untuk menjelaskan fenomena tersebut. Salah satu teori yang ada menyalakannya berdasarkan penawaran saham perdana (*initial public offering*=IPO), underpricing telah menjadi suatu subjek berbagaimana. Konsisten dengan temuan di pasar modal lain, hasil penelitian menunjukkan bahwa sebagian besar IPO mengalami underpricing sebesar 22,35 persen, sedangkan saat SEO, dengannya yang melakukannya IPO mengalami underpricing sebesar 13,35 persen. Tingkat underpricing saat IPO dengannya saat SEO secara statistik tidak berbeda. Perusahaan dengan tingkat underpricing lebih tinggi saat IPO akan mengalami tingkat underpricing lebih rendah saat SEO. Secara keseluruhan, hasil penelitian belum berhasil mendukung teori sinyal dalam IPO.

Abstrak

Keywords: underpricing, IPO, SEO, signaling hypothesis

Support the hypothesis that IPO underpricing is used as signal for firm quality underpricing SEO. This experiment high underpricing will experience lower underpricing in SEO. Overall, the finding does not support the hypothesis that higher underpricing between IPOs and SEOS is not significantly different from zero. IPO firms are significantly underpriced as much as 22,35 percent, whilst for SEOS the average underpricing is 13,35 percent. The level of underpricing between IPOs and SEOS is not significantly different from zero. IPO firms are significantly underpriced as other capital studies, results show that, on average, the Indonesian Stock Exchange. Consistent with other capital studies during 1990-2006 at IPOs and SEOS whether underpricing could signal firm quality when making right issue during 1990-2006 at offerings (SEO), it will gain positive response from the market. This study aims at examining a sample of 85 offerings (SEO), hoping that when the firm is going to reissue stock in the future, namely right issue or seasoned equity forward to explain why such phenomenon occurs. One of them is that underpricing is used as a signal of firm quality, hoping that when the firm is going to reissue stock in the future, namely right issue or firm quality. Underpricing is known as one of three anomalies surrounding IPO setting. A number of theories have been put forward to explain why such phenomenon occurs. One of them is that underpricing is used as a signal of firm quality, hoping that when the firm is going to reissue stock in the future, namely right issue or firm quality.

Keywords: underpricing, IPO, SEO, signaling hypotheses

Underpricing has become a subject for various examinations in initial public offerings (IPO) context. Underpricing is known as one of three anomalies surrounding IPO setting. A number of theories have been put forward to explain why such phenomenon occurs. One of them is that underpricing is used as a signal of firm quality, hoping that when the firm is going to reissue stock in the future, namely right issue or seasoned equity offerings (SEO), it will gain positive response from the market. This study aims at examining a sample of 85 IPOs and SEOs whether underpricing could signal firm quality when making right issue during 1990-2006 in the Indonesian Stock Exchange. Consistent with other capital market studies, results show that, on average, IPOs experience higher underpricing between IPOs and SEOs is not significantly different from zero. IPO firms are significantly underpriced as much as 22.35 percent, whilst for SEOs the average underpricing is 13.35 percent. The level of underpricing between IPOs and SEOs is not significantly different from zero. Overall, the finding does not support the hypothesis that IPO underpricing is used as signal for firm quality underpricing SEO.
