**2<sup>nd</sup> International Conference on Medicine and Health Sciences**

**PROGRAMME**

**1<sup>st</sup> December 2018**

07.00-08.00	Registration	
08.00-09.00	Plenary lecture	<b>Dr. Phurpa Wangchuk</b> (Australian Institute of Tropical Health and Medicine)
09.00-10.00	Plenary lecture	<b>Dr. Phillip du Cros MBBS M.Clin. Epid</b> (Infectious Disease Specialist, TB Elimination and Implementation Science- Burnet Institute-Australia)
10.00-10.15	Coffee break I	
10.15-11.15	Plenary lecture	<b>Assoc Prof. Wakako Tsugawa</b> (Tokyo University of Agriculture & Technology - Japan)
11.15-12.15	Plenary lecture	<b>Prof Bhisma Murti, MD, MPH, MSc, Ph.D</b> (Masters Program in Public Health, Graduate School, Universitas Sebelas, Indonesia) <b>Path Analysis, SEM, and Multilevel Modeling: An Alternative Approach to Health Data Analysis</b>
12.15-13.15	Moslem prayer + Lunch	
13.15-16.30	<b>POSTER PRESENTATION</b> (Lobby Aston Hotel) PP (50 - 142)	<b>ORAL PRESENTATION</b> Kisho Room: OP- (13 - 25) Tulip Room: OP- (26 - 33) Saphire Room: OP- (34 - 41)

ORAL PRESENTATION, 1 <sup>st</sup> December 2018 SHAPIRE Room		
SHAPIRE Room 13.15-13.45	IS-8 Ancah Caesarina	Invited Speaker-8 Healthcare professionals' behavior role in a healthcare-associated infections prevention program
SHAPIRE Room 13.45-14.15	IS-9	Invited Speaker-9
SHAPIRE Room 14.15-14.30	OP-34 Nazefah Abdul Hamid	Human papillomavirus-16 E2 as an apoptosis-inducing protein for cancer treatment: a systematic review
SHAPIRE Room 14.30-14.45	OP-35 Antonius Nugraha W Pidi Pratama	Medication Adherence amongst Leprosy Patients in Sumenep, Indonesia
SHAPIRE Room 14.45-15.00	OP-36 Iin Triwahyuni	The potential of cocoa beans( <i>Theobroma cacao</i> ) as an anticancer agent, between challenges and expectation
SHAPIRE Room 15.00-15.15	OP-37 Erla Sulistyaningsih	Purification and Sequence Analysis of CIDR1a-PIEMP1 Recombinant Protein from Indonesian <i>Plasmodium falciparum</i> Isolate
SHAPIRE Room 15.15-15.30	OP-38 Noor Setiyadi	Prevalence of Drug Resistant of Tuberculosis Suspect: Case Study In Sukoharjo Central Java Indonesia
SHAPIRE Room 15.30-15.45	OP-39 Supangat	Case Report: Gastrostomy and Duodenostomy Prior to Primary Esophageal Repair in A Long Gap Type C Esophageal Atresia
SHAPIRE Room 15.45-16.00	OP-40 Dewi Dianasari	Increased Expression of Insulin Receptor Protein with Sodium Orthovanadate in Alloxan-Induced Diabetes Mellitus Mice
SHAPIRE Room 16.00-16.15	OP-41 Nor Eyzawiah Hassan	RAPIDLY GROWING MASS IN THE EAR CANAL; A RARE CASE OF ISOLATED SUPERFICIAL ANGIOMYXOMA

## **Case Report: Gastrostomy and Duodenostomy Prior to Primary Esophageal Repair in A Long Gap Type C Esophageal Atresia**

### **Abstract**

Esophageal atresia (EA) with or without tracheoesophageal fistula (TEF) are one of congenital anomalies in alimentary tract. Esophageal atresia may present as single anomaly or associated with other congenital anomalies. We report a case of EA with TEF that presented as a single anomaly. Aspiration pneumonia has always been a threat in these patients. The esophageal atresia may cause hypersalivation that will develop into aspiration pneumonia if the saliva does not get removed adequately. An oroesophageal tube may be useful to confirm patency of the distal esophageal pouch and to evacuate saliva preventing aspiration pneumonia as a standard technique in patient with EA-TEF. Gastrostomy-jejunostomy are well known techniques used in long gap esophageal atresia, providing both decompression and enteral feeding. However, decompression and enteral feeding in our case were provided through gastrostomy-duodenostomy.

**Keywords:** *esophageal atresia, gastrostomy and duodenostomy*

## Case Report

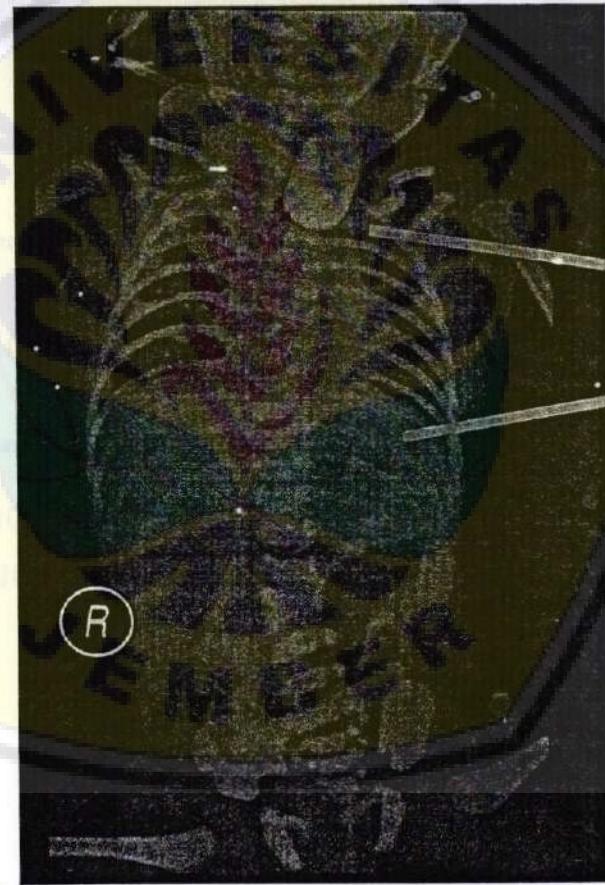

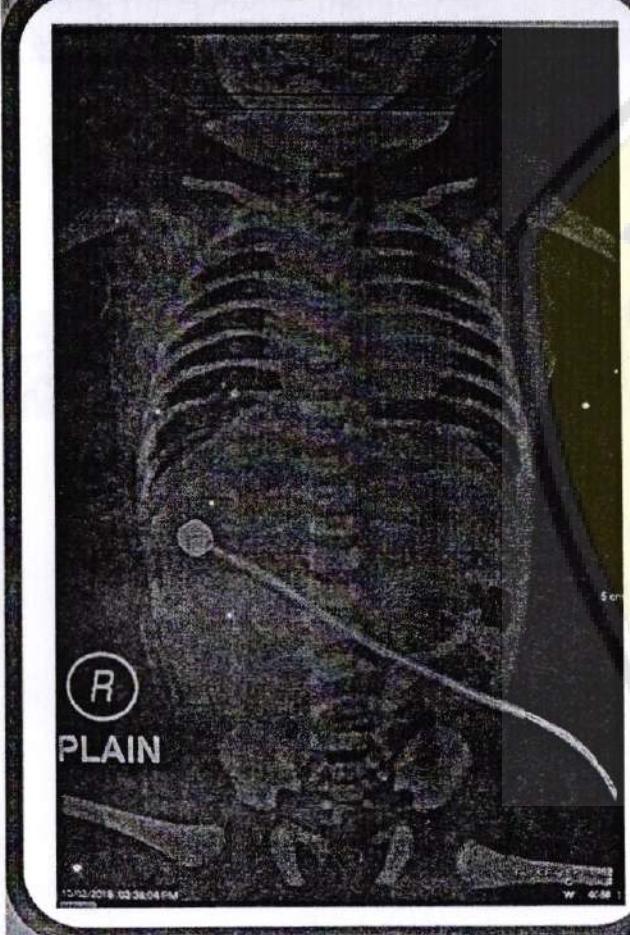

**Gastrostomy and Duodenostomy Prior to  
Primary Esophageal Repair in A Long Gap  
Type C Esophageal Atresia**

## History

- 2-days old female infant
- oral secretion and vomiting (susp. EA)
- C-section indicated by polyhidramnios, PROM, C-section history
- BW: 2450g; AS:7-8

## Case History

- Contrast cut off at T2-T3
- Visible distal bowel gas
- Contrast did not go into respiratory tract

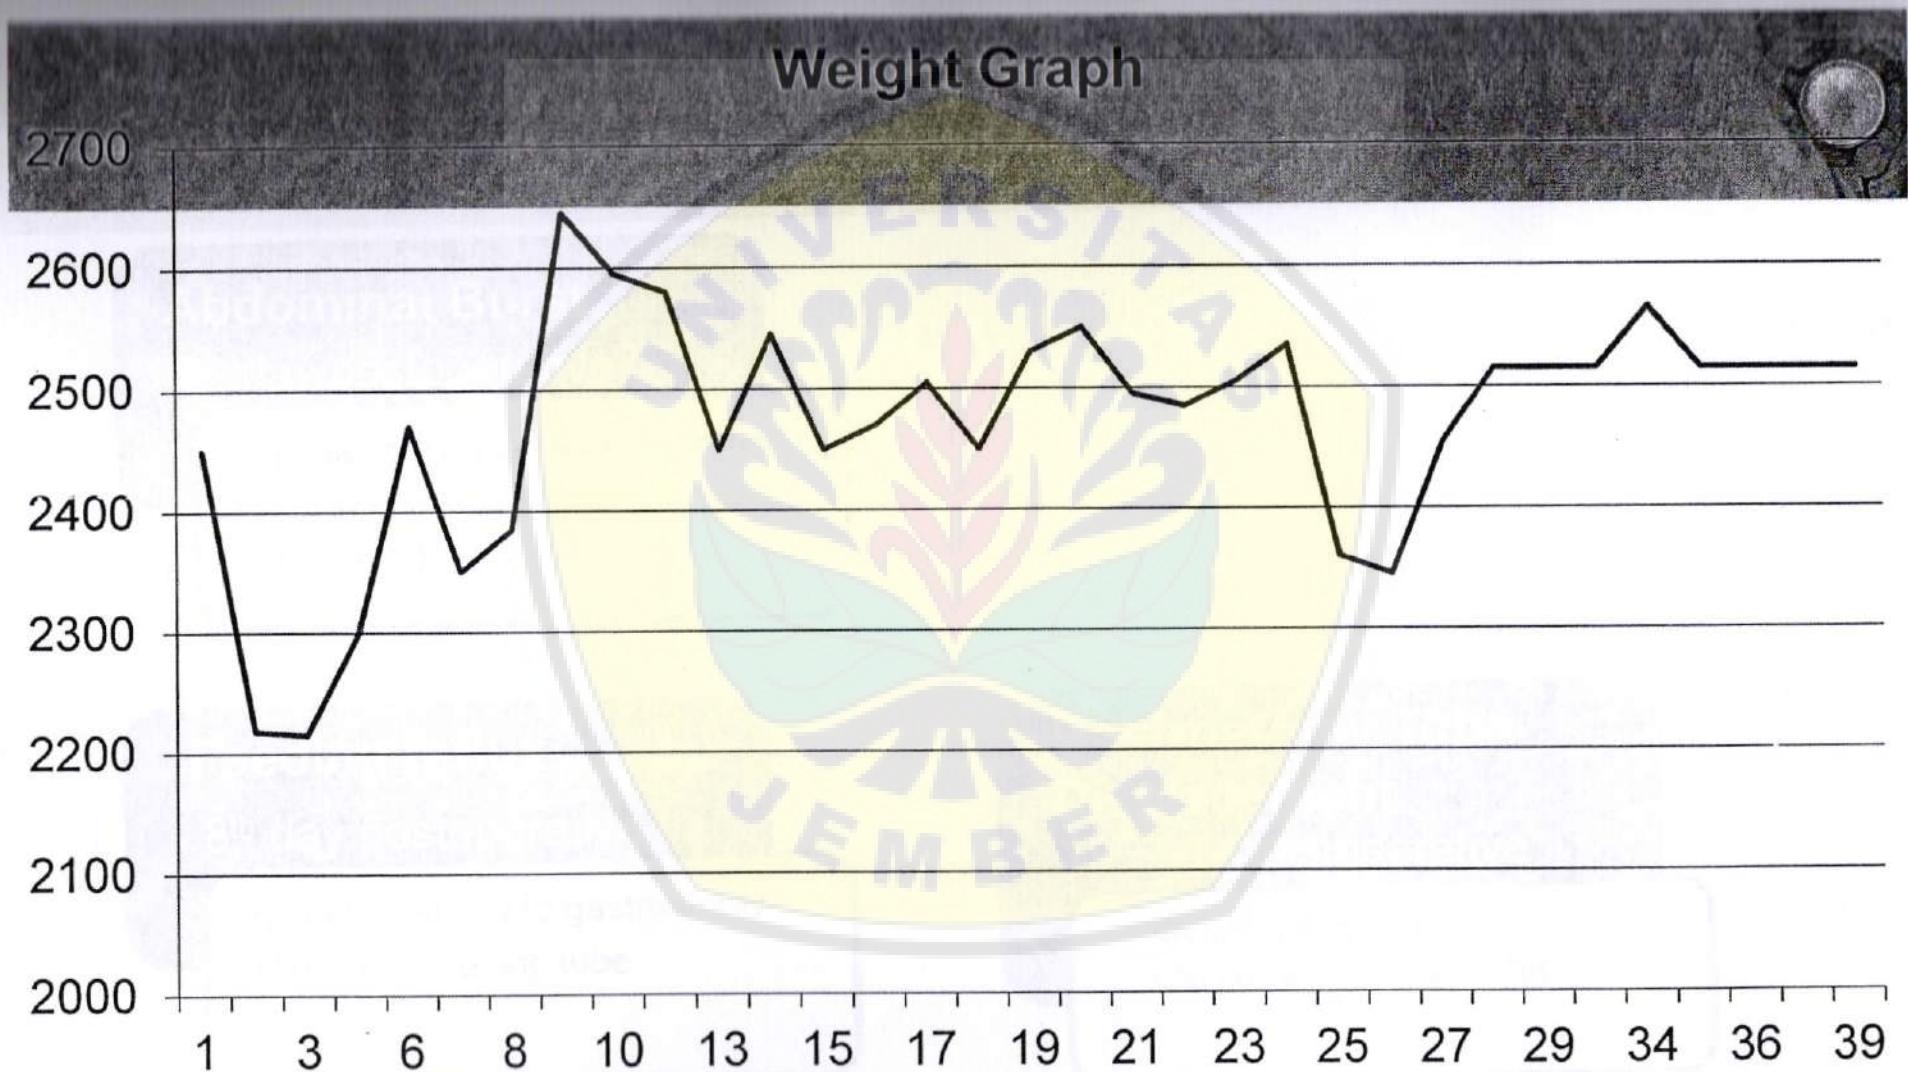

# Case History management plan

## Early Management

Decompression gastrostomy,  
feeding duodenostomy.

Primary esophageal  
repair

# Case History Complications butuh revisi

## Abdominal Burst

3<sup>rd</sup> day postoperative

- Hypoalbuminemia (suspected underlying process)
- Repair in OR

## Feeding reflux

8<sup>th</sup> day postoperative

- Duodenostomy to gastrostomy
- Adjusting feeding tube

## Gastrostomy Tube Displacement

19<sup>th</sup> day postoperative

- Replacing the tube
- Did not require repair in OR
