## Predictors of pediatric surgeons' career satisfaction: a national survey

Stjepan Višnjić, Božidar Župančić and Mirko Žganjer

**Objective** A survey was performed to identify factors for professional career satisfaction and for dissatisfaction.

**Methods** During General Assembly of CSPS, attendees answered the 37-question form grouped into the following categories: demographic, professional activity and organizational issues, type of service, education, and compensation and status. Data were analyzed using the Pearson  $\chi^2$  test ( $P < 0.05$ ).

**Results** The response rate was 74.5% ( $n =$

facilities (73%). An overall 57% of responders had presented paper on international congresses, and 32% had published paper in indexed journals. Two major concerns about education are insufficient training (61%) and lack of time for continuous education (79%).

**Conclusion** Pediatric surgeons are satisfied with professional career. Patient care is a leading area of satisfaction. Educational, organizational, technical, and

### PRESIDENTIAL ADDRESS

## Why Pediatric Surgery? A Personal Journey Through the First 50 Years

J. Alex Haller, Jr., MD

From The Johns Hopkins University, School of Medicine, Baltimore, Maryland

"Why pediatric surgery?" asked my first and most illustrious mentor in surgery, Dr. Alfred Blalock (Chief of Surgery in the Johns Hopkins Hospital, 1941–1964), when I told him, as a new Halsted surgical intern in 1951, that pediatric surgery was my goal (Fig. 1). I was immediately

## Pediatric Surgery in Undergraduate Curriculum: a Survey

Hemonta Kr. Dutta<sup>1</sup> • Mauchumi Baruah<sup>2</sup>

Received: 29 June 2019 / Accepted: 11 March 2020 / Published online: 3 March 2020  
© Association of Surgeons of India 2020

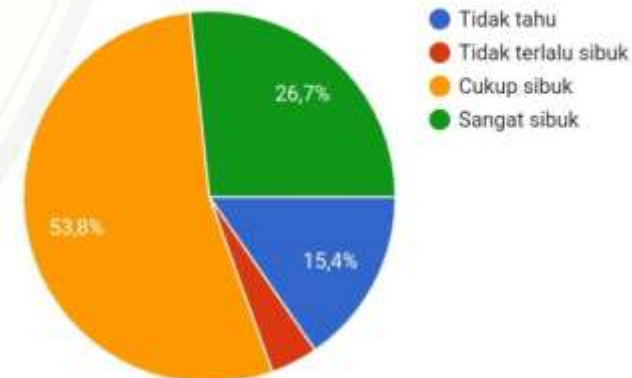

### Abstract

Pediatric surgical topics are not generally covered in undergraduate (UG) curriculum in India. However, incorporating pediatric surgery in UG curriculum will help in improving the total surgical care of infants and children, and will also motivate students to choose pediatric surgery as a career option. The purpose of the study was to identify the main objectives of pediatric surgery in UG curriculum and to evaluate the input of specialist, non-specialist, and students to these objectives. The survey was conducted among various stakeholders in three medical colleges in the state using a pre-designed questionnaire to identify the needs to incorporate pediatric surgery in UG curriculum. Twenty-five common topics of pediatric surgery were enlisted for the survey. All

# Perception of Undergraduate Pediatric Surgery Clerkship in a Developing Country

Sebastian O. Ekenze, MD, and Uchechukwu M. Obi

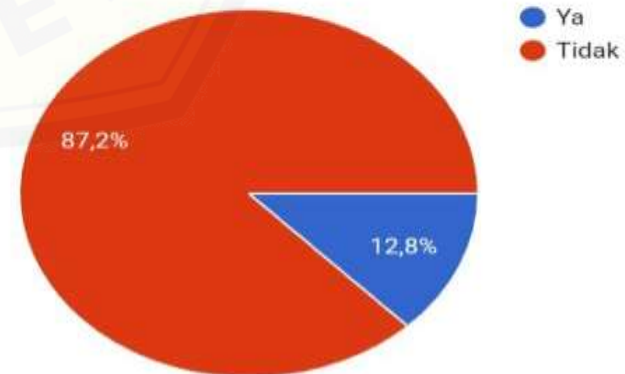

Sub-department of Paediatric Surgery, University of Nigeria Teaching Hospital, Enugu, Nigeria

**OBJECTIVE** Medical students' perception of their elective clerkship curriculum may influence their choice of ultimate career. In most medical schools, pediatric surgery clerkship (PSC) is not compulsory. This study evaluates the perception of PSC by

of the clerkship curriculum will affect their interest in pediatric surgery as a career choice. (J Surg 2014; 49: 1-5. © 2014 Association of Program Directors in Surgery. Published by Elsevier Inc.
