STATEMENT OF THESIS AUTHENTICITY

I certify that this thesis is an original and authentic piece of work by the author herself. All materials incorporated from secondary sources have been fully acknowledged and referenced.

I certify that the content of the thesis is the result of work which has been carried out since the official commencement date of approved thesis title; this thesis has not been submitted previously, in whole or in part, to qualify for any other academic award; ethics procedure and guidelines of thesis writing from the university and the faculty have been followed.

I am aware of the potential consequences of any breach of the procedures and guidelines, e.g. cancellation of my academic award.

I hereby grant to the University of Jember the right to archive and to reproduce and communicate to the public my thesis or project in whole or in part in the University/Faculty libraries in all forms of media, now or hereafter known.

ACKNOWLEDGMENT

First of all, I would like to thank Allah SWT who always leads and grants me blessing and mercy so that I can finish my thesis entitled, ‘The Effect of Using Riddles on the Seventh Grade Students’ Vocabulary Achievement At SMPN 1 Jenggawah in the 2012/2013 Academic Year”.

In relation to the writing and finishing of this thesis, I would like to express my great appreciation and sincerest gratitude to the following people:

1. The Dean of the Faculty of Teacher Training and Education, Jember University,
2. The Chairperson of the Language and Arts Education department,
3. The Chairperson of the English Language Education Study Program,
4. My Academic Consultant, Dra. Siti Sundari, M.A.
5. My Consultants, Dra. Wiwiek Eko Bindarti, M.Pd. and Dra. Made Adi Andayani T, M.Ed. I do thank for your time, guidance, valuable advice, patience, and motivation that had led me compile and finish my thesis.
6. The Examination Committee and the Lecturers of the English Education Program.
7. The Principal of SMPN 1 Jenggawah, the English teacher, the administration staff, and the seventh grade students who gave me permission and helped me to obtain the data for the research.
8. My friends who have supported and helped me to finish this thesis. I will miss the time we spent together.

I believe that this thesis might have some weaknesses. Therefore, any criticism from those who really want to improve the thesis will be wisely appreciated.

Jember, May 30th 2013

The Writer

SUMMARY

The Effect of Using Riddles on the Seventh Grade Students' Vocabulary Achievement at SMPN 1 Jenggawah in the 2012/2013 Academic Year; Siti Aisyah, 080210401017; 2013:43 pages; English Language Education Study Program, Language and Arts Department, Faculty of Teacher Training and Education, Jember University.

Vocabulary is one of the language components that cannot be separated from learning English in general. It is the key aspect of the four language skills. According to Tarigan (1993:2) the quality of someone's language skills depends on his quality and quantity of the vocabulary mastery. It means that the students have to enlarge or enrich their knowledge of vocabulary besides mastering all aspects of the English language skills. In order to motivate students to learn English especially vocabulary, the English teacher should use the appropriate techniques in teaching learning process. The appropriate and interesting teaching techniques will encourage students to spend more attention so that the teaching learning process will run more effectively and efficiently.

One of the techniques that can be used to teach vocabulary is riddles. Riddles can make the students enjoy in teaching learning process and make the students interested and motivated in learning English. In other words, if the students are interested and motivated in learning English, they will be easier to understand and comprehend the words they learn so that it can influence their achievement.

This research was quasi experimental research. The purpose of this research was to investigate whether or not there was a significant effect of using Riddles on the seventh grade students' vocabulary achievement at SMPN 1 Jenggawah in the 2012/2013 academic year. The area of this research was SMPN 1 Jenggawah. It was chosen purposively because the use of riddles had never been applied in teaching

learning process in this school. The populations of this research were the seventh grade students of SMPN 1 Jenggawah in the 2012/ 2013 academic year. The research respondents were determined by cluster random sampling through a lottery. The total number of the respondents was 78 students that consisted of 40 students of VII-C as the experimental group taught vocabulary by using riddles and 38 students of VII-A as control group taught vocabulary by using lecturing and question-answer techniques.

The data of this research were collected from the students' scores of vocabulary achievement test, interview and documentation. The vocabulary achievement test was collected from the post test to know the mean score of the two groups, and the result was analyzed by using t-test formula through SPSS. Based on the calculation, the mean score of the experimental group was higher than the mean score of the control group. The result of the t-test analysis with significant level of 5% shows that the significant value is 0.033 that is lower than 0.05. It means that there was a statistical difference between the experimental and the control groups. It indicated that there was a significant effect of using riddles on the seventh grade students' vocabulary achievement at SMPN 1 Jenggawah in the 2012/2013 academic year. Therefore, it is recommended for the teacher to use riddles as a technique in teaching vocabulary.
