Abstract: This study aims to test and analyze the impact of entrepreneurship learning achievement and industrial practices to interest in entrepreneurship of student of class XII SMK Negeri 2 Lumajang. This study using validity test, reliability test, linear analysis regression, analysis of multiple coefficient terminated (R²), F test, and t test. The respondents were students of class XII SMK Negeri 2 Lumajang, the amount of sample are 79 respondents. Data analysis techniques used to test the hypothesis was a multiple linear regression analysis. F test results show $F_{hitung} > F_{table}$ with a value amounting F_{hitung} 35.502 and F table value at 5% significance level is amounted to 4.04 so it can be concluded that H₁ is accepted. This shows that all the independent variables (Independent), the Entrepreneurship Learning Achievement (X₁) and Industrial Work Practices (X₂) simultaneously (together) have a significant effect on the dependent variable (dependent), namely Interests Entrepreneurship (Y) class XII students SMK Negeri 2 Lumajang.

Keywords: achievement entrepreneurship, work practices industry, interest in entrepreneurship
