APPROVAL SHEET

Approved and received by the Examination Committee of the English  
Department, Faculty of Letters, University of Jember

Jember, Maret 2000

Secretary

Dra. Dina Dyah Kusumayanti, MA

Chairman

Drs. Samudji, MA

The members:

1. Dr. Suparmin, MA

2. Dra. Meilia Adiana, M. Pd

3. Drs. Sukamo, M Litt

(*Suparmin*)  
(*Meilia Adiana*)  
(*Sukamo*)

Dedicated with all my love to:

- \* my beloved parents; *O.Adisoedarmanto and Suyatni*

Thank you very much for your struggle, pray and care.

You've always been there with your love. I'm so lucky to have both of you.

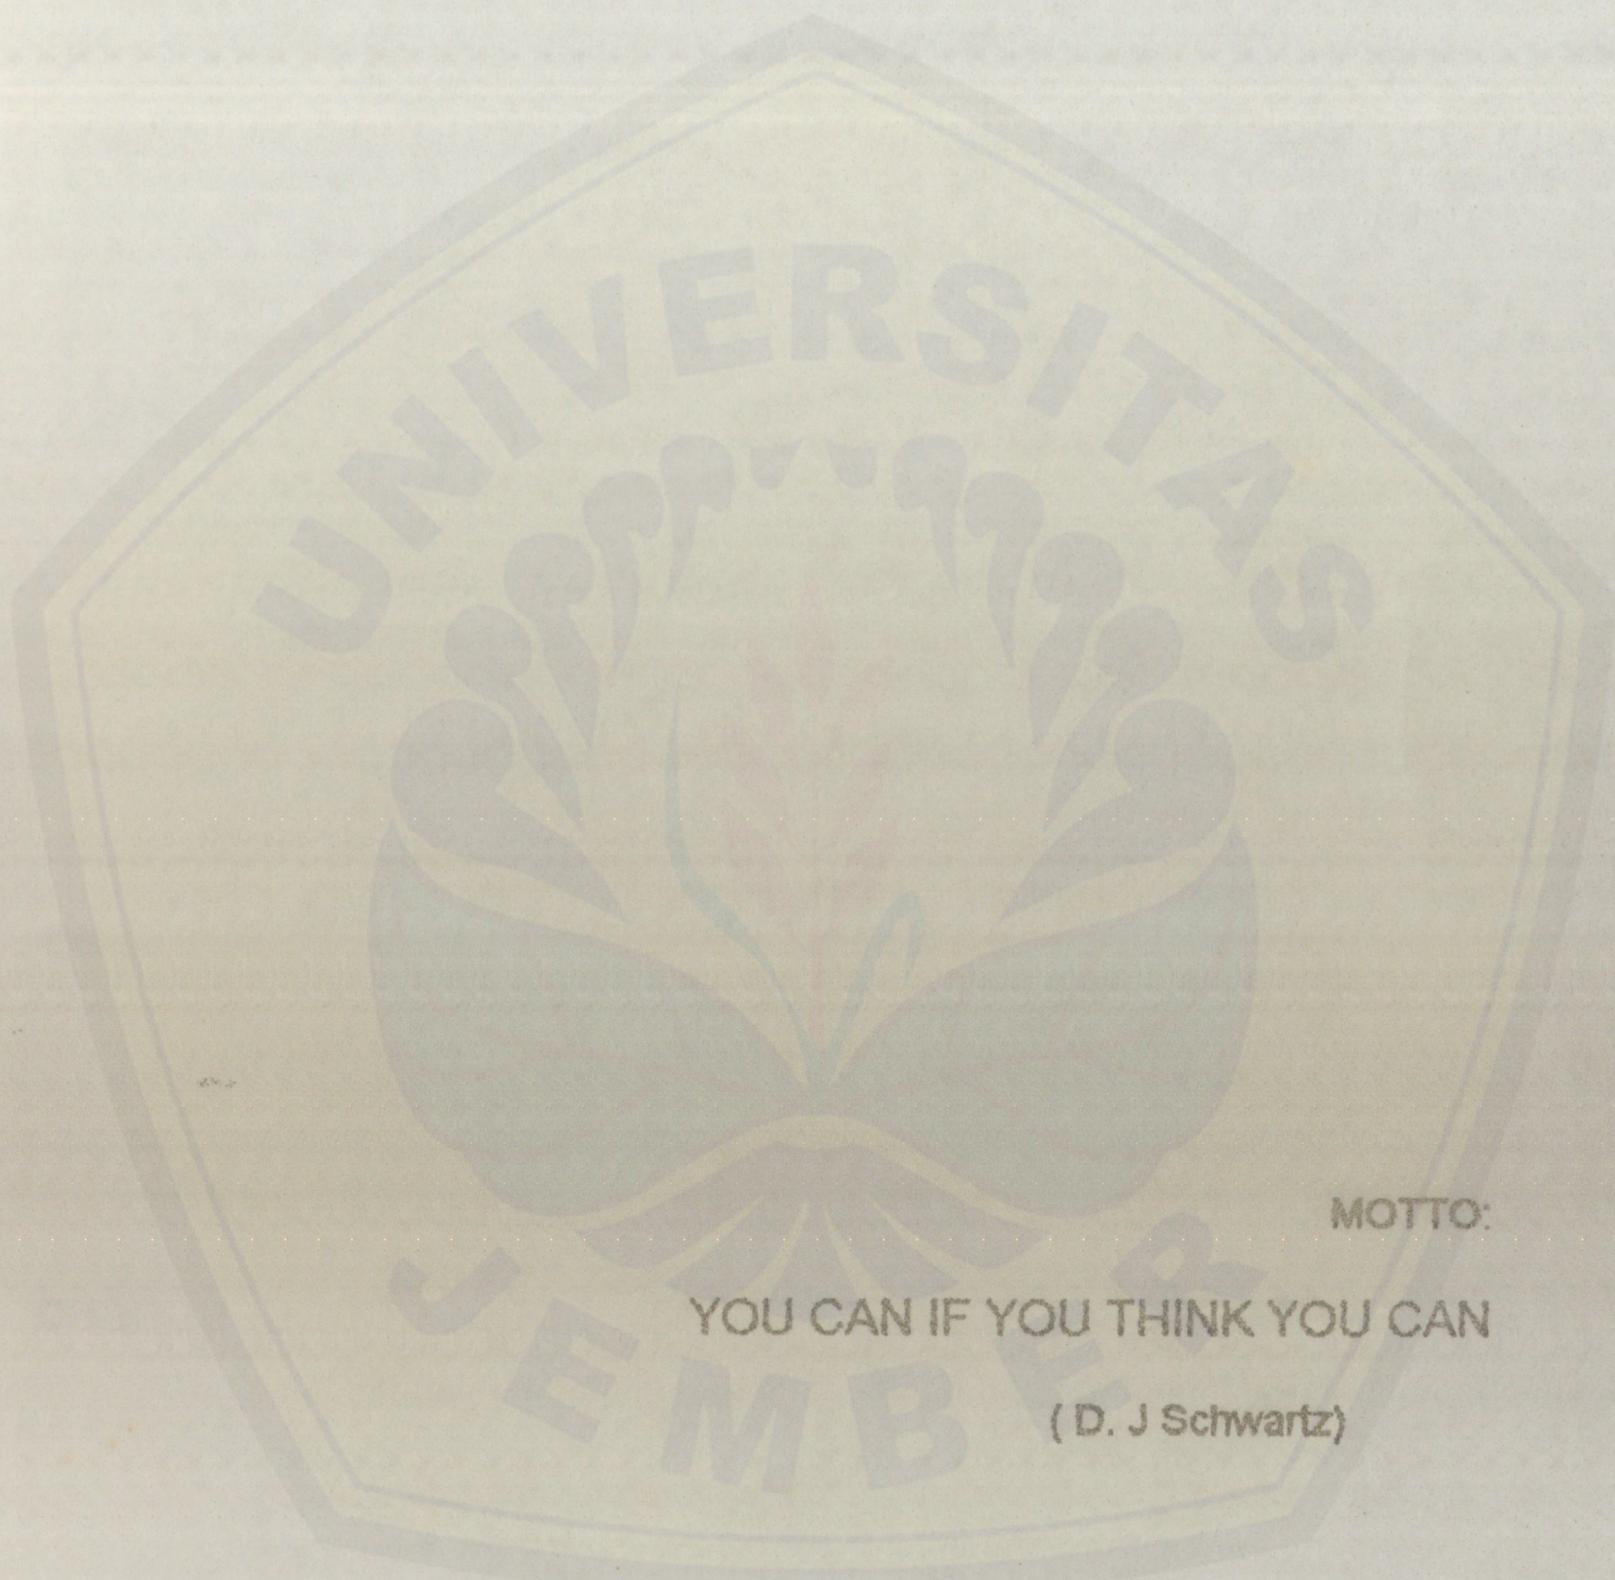

- \* my beloved brother and sisters; *Alik, Indah, and Atik*

Thank you for the love and care you put into everything that you do for me.

Everything is happy when we are together

- \* *Kamas Hadi*

I'm everything I'm because you love me

## ACKNOWLEDGMENT

Above all, I would like to express my best praise to Allah SWT, the most Beneficent, the Almighty, and the Merciful, for His mercy and blessing in giving me a great deal of knowledge to finish writing this thesis.

This thesis is arranged to fulfill one of the requirements to get the award of Sarjana Sastra degree at the Faculty of Letters, University of Jember. However, the achievement of this thesis cannot be completed without the help of many people. I would like to express my gratitude with all of respect to the persons for their guidance to the completion of this thesis, especially:

1. Drs. Sudjadi, the Dean of the Faculty of Letters, University of Jember, Dr. Suparmin, MA, the Head of the English Department, for the permission they give me to start writing this thesis;
2. Dr. Henriono Nugroho, MA and Dra. Meilia Adiana, MPd, my first and second advisors who voluntarily and kindly supported and guided me to achieve the writing of the thesis;
3. All of the lecturers of English Department who have given me their best knowledge during my study;
4. The Librarians of Faculty of Letters, as well as of the Central Library of University of Jember, who have permitted me to read, borrow, and copy a number of books.

Most of all, I would like to express my grateful acknowledgment to my parents, brother, sisters, and my honey. Thank you for your support. Furthermore, my sincere indebtedness is due to my classmates in English Department. Thank you for your friendship and help. The last but not the least, my countless thanks are due to my close friends; Yuli, Iyoh, Arso, Alif ; and all my friends at Jl. Jawa 31, Fatim, IL, Lilis, Rini, Fika, Ratna, Linda, Widya, Lina, and Sobah.

Finally for the improvement of this thesis, I hope for the suggestion and advice from the readers, particularly those who would like to study English idioms. Hopefully this thesis will be useful for those who want to improve their knowledge in studying English idioms.

Jember, Maret 2000

## CHAPTER I

### INTRODUCTION

#### 1.1 The Background of the Study

According to Hornby (1987:473), "language is a human method of communicating ideas, feelings, and desires by means of system of sounds and sound symbols". Meanwhile, Anne and Peter (1974:76) in their book Language and Community state:

it is to this total capacity for using language in everyday life that we give the label 'language for living'. The name itself reflects the basic idea that without language there can be no community, no shared activity, no shared experience, one might say, indeed 'no living'...

From the statement above, it can be concluded that language is very significant and cannot be separated from human life.

For those reasons language is used and learnt by human being. In communication it is used in the form of either spoken or written. Studying about language, we cannot neglect the components of language. One of the main components of language is vocabulary. Realizing the fact, the learners of the language should have competence in vocabulary besides other competence. The vocabulary of a language grows continually with new development in knowledge. New Ideas need new labels to name them (Seidl and McMordie, 1988:11). In other words, it is important to learn vocabulary to know its development.

Dealing with vocabulary there are fixed phrases with special different meaning of the individual words, such expressions are called as idioms. All languages contain many idiomatic expressions. In English, for instance, the idiomatic expressions are shown as follows:

(the) cold war,

take part in,

lose face,

a black list,

make sense, etc.

Those idiomatic expressions respectively have similar phrases in Indonesian such as:

*perang dingin*,

*ambil bagian*,

*kehilangan muka*,

*daftar hitam*,

*masuk akal*, etc.

In this case, the meaning of (the) cold war is nearer to the meaning of war and the meaning is similar to *perang dingin*, but the meaning of make sense is not related to *make or sense* and the meaning is similar to *masuk akal*.

Idioms are an essential part of English and they are not a separate part of it. They are commonly used in all types of languages, spoken and written, formal and informal. There are so many idiomatic expressions in English, therefore, it is said that English is an idiomatic language (Simon, 1991). One's language skill will increase rapidly if s/he understands idioms and uses them correctly. In addition, it will be better to learn idiom to master English.

It is significant to know well about idioms. On the other hand, it is not easy to understand them correctly. One of the main problems dealing with idioms is that it is often impossible to guess the meaning of an idiom from the meaning of individual words. Another problem is in which situation it is used. A further problem is that it is impossible to translate idioms into or from one's native language (Seidl and McMordie, 1988). One way to know more about the

idiom is to compare two or more languages. Comparison is a way to show the similarities and differences between two or more objects by using certain rule. (Keraf, 1982:16). This thesis will compare English with Indonesian idiomatic expressions.

Based on the above description, this thesis attempts to find out the similarities and differences between English and Indonesian idiomatic expressions, so the thesis entitled '*A Comparative Study Between English and Indonesian Idiomatic Expressions*'.

## 1.2 The Problem to Discuss

Idiomatic expressions have interesting aspects to be analyzed like: why is the idiom *white house* used as the residence of the President of United States? Why not *big house*? Why is the idiom *the apple of one's eye* used to express something or someone that is loved while Indonesian used *buah hati* to express the same idea? Why do English and Indonesian use *(the) cold war* and *perang dingin* which have similar meaning? Those problems will not be analyzed in this thesis. This thesis is especially going to discuss:

1. what are the structures of English and Indonesian idiomatic expressions?
2. what are the similarities and differences between English and Indonesian idiomatic expressions?

For example, the idioms *make sense* and *masuk akal* have the same idea and structurally consist of Verb and Noun, thus belong to Verb Phrase. The form of *make sense* can be separated by other words (good/no), the form becomes *make good sense* and the verb may be changed into past tense, so the form becomes *made sense*. While the form of *masuk akal* is fixed, it cannot be separated by other words and the verb cannot be changed.

### 1.3 The Scope of the Study

There are many problems dealing with idiomatic expressions. It will be quite difficult to discuss all aspects of the idioms. In order to have a better result, this thesis focus on the similarities and differences between English and Indonesian idiomatic expressions. In this case, it will be focused on the structure of phrases. According to Goffin and McMordie (1960) there are three types of English idiomatic expressions:

1. type of word, usually found in contraction of words (*can't* for cannot, *o'clock* for of the clock, etc.), abbreviations (*Capt.* for Captain, *Dr.* for Doctor, etc.), peculiar uses of peculiar words (*Prices fall*, *The wind falls*, etc.);
2. type of phrase, dealing with part of speech (*crocodile tears*, *an open secret*, *behind the scenes*, etc.);
3. type of sentence, used in proverb and saying (*bad news travel fast*, *where there is a will there is a way*, *first things first*, etc.).

Chaer (1986, 8) states that Indonesian also has three types of idiomatic expressions, they are:

- 1.type of word, such as *gula-gula*, *tupai-tupai*, etc.;
- 2.type of phrase, such as *kambing hitam*, *batu loncatan*, etc.;
- 3.type of sentence, such as *nona makan sirih*.

This thesis will discuss the second type only, since this type deals with the structure of phrases. The thesis will compare English and Indonesian idiomatic expressions which have similar meaning and structure or similar meaning but different structure.

#### 1.4 The Organization of the Thesis

The thesis consists of five chapters. Chapter one is divided into five subchapters, they are the background of the study, the problem to discuss, the scope of the study, the organization of the thesis, and the goal of the study. Chapter two is theoretical review that talks about some linguists' statements dealing with the thesis. The next chapter, chapter three, discusses the method of research. Discussion is presented in chapter four. The last chapter is the conclusion of the thesis.

#### 1.5 The Goal of the Study

Every kind of writing has some goals, such as informing, instructing, entertaining, and expressing feeling or emotion. This thesis has a main goal, that is to inform the readers the similarities and differences between English and Indonesian idiomatic expressions by giving detail descriptions. It is also to apply the knowledge of English I got during my study at the Faculty of Letters, University of Jember.

By reading the thesis, it is hoped that the writer and the language learners, especially the students of English Department, Faculty of Letters, University of Jember can take some advantages to improve their language skills especially their ability in using idiomatic expressions.

## CHAPTER II

### THEORETICAL REVIEW

#### 2.1 The Definition of Idiom

Seidl and McMordie (1988:13) define that "idiom is a number of words which, when taken together, have a different meaning from the individual meanings of each word". Based on Longman Dictionary of English Idiom, "idiom is a fixed group of words with a special different meaning of the separate words" (Long and Summer, 1992). For example, *under* means 'below' and *weather* means condition of sun, wind, temperature, etc. at particular area and time', while *under the weather* as an idiom means 'unwell'. In other words, the meaning of *under the weather* as an idiom has no connection with either *under* or *weather*.

According to Cruse (1995:37), idiom is an expression which meaning cannot be explained as a compositional function from the meanings of the individual words. Similarly, Fromkin (1983:184) states that "idiom is a fixed phrase, consisting of more than one word, with meanings that cannot be inferred by knowing the meanings of the individual words". For instance, the meaning of *kick the bucket* cannot be predicted from the meaning of *kick* or *bucket*. If we guess the meaning of it through the meaning of the individual words, the meaning of it will be 'hit a round open container with a handle for carrying liquids with foot'. Really *kick the bucket* means 'to die'. It is often impossible to guess the meaning of the idiom from the meaning of the separate words.

Nida (1979:113) explains that "idioms are combinations of words which have both a literal and nonliteral meaning, but the connection between the two cannot be described as representing an additive process". Accordingly, a *black*

*list* has literal semantic structure (*a list*) and nonliteral ones (*black*). It shows that an idiom can be predicted from one of its element. It is different from the former definition.

Meanwhile, based on Oxford Advanced Learner's Dictionary of Current English, idiom is a phrase or a sentence of which the meaning is not obvious through knowledge of the individual meanings of the constituent words but must be learnt as a whole, as an idiom. He points out that the idiom can occur in type of phrase or sentence.

Based on Webster's Third New International Dictionary, "idiom is an expression established in the usage of a language that is peculiar to itself either in grammatical construction or in having a meaning that cannot be derived as a whole from the conjoined meanings of its elements (as *Monday Week* for "the Monday a week after next Monday")" (Webster et al, 1966:1123). It shows that grammatically as well as semantically, an idiom has very special characteristics.

Based on Kamus Besar Bahasa Indonesia, idiom is a construction of words of which the meaning cannot be described from the meanings of the combination of the elements (Pusat Pembinaan dan Pengembangan Bahasa, 1991). Meanwhile, according to Chaer (1986:7) idiom is an expression (may be in type of word, phrase, or sentence) of which the meaning cannot be derived from the general principle of the language, or cannot be inferred from the lexical meaning of the individual words. For instance, *besar* means 'big' and *mulut* means 'mouth'. *Besar mulut* as idiom means 'boastful; much talk'.

Another definition is derived from Ensiklopedia Indonesia III, it is said that an idiom is a peculiar form of a language; contraction of word that do not deviate from the general structure of a language, so it is different from other languages (Shadily et al, 1982:1367).

Based on the description, a simple conclusion about the definition of the Idiom can be made. At least there are four points concerned with idiom. The first, the meaning cannot be predicted from the meaning of its element (but sometimes it can be inferred from one of its elements). The second, the meaning is different from the meaning of its element. The third, it has a peculiar in either grammatical construction or meaning. The last, an idiom may be in the type of word, phrase, or sentence.

## 2.2 Types of English Idiomatic Expression

According to Palmer (1984:81) there are two types of English Idiom, such as total and partial idioms.

- a) We call an idiom as partial idiom where one of the words has usual meaning, the other has a meaning that is peculiar to the particular sequences. For example, *an open secret* refers to secret, it means 'one that has become generally known but which is still supposed to be a secret (Seidl and McMordie, 1988:72); *a blue film* refers to film, it means 'pornographic film' (Seidl and McMordie, 1988:204); a *black list* means 'a list of persons who are considered to be dangerous/undesirable/disloyal, etc. (Seidl and McMordie, 1988:203). *Secret, film, and list* on those expressions have usual meaning, while *open, blue, and black* have peculiar meaning.
- b) Total idiom is an idiom where the combination of meaning is not related to the meaning of the individual words. For instance, *a bitter pill* means something that is unpleasant or difficult to accept (Seidl and McMordie, 1988:64), *a stepping stone* means a job or position which helps towards something better or higher in someone's profession, social status, etc. (Seidl and McMordie, 1988:76)

On the other hand, Katz and Postal (1963) divide idiom into lexical and phrase idiom.

- a) Lexical idiom refers to the characteristic of idiom that an idiom is not a compositional function of the meanings of its parts.
- b) Phrase idiom refers to level syntactic categories, it means that the form of an idiom is based on level syntactic categories. The form of an idiom may be Noun Phrase, Verb Phrase, Adjective Phrase, Adverb Phrase, or Prepositional Phrase, for example; *a black list* (NP), *make sense* (VP), *red in the face* (Adj P), *under age* (PP) etc.

In this case, the thesis will discuss phrase idiom that is also partial idiom (*a blue film*, *a black list*, *an open secret*, etc.) and phrase idiom that is also total idiom (*a bitter pill*, *a stepping stone*, etc.).

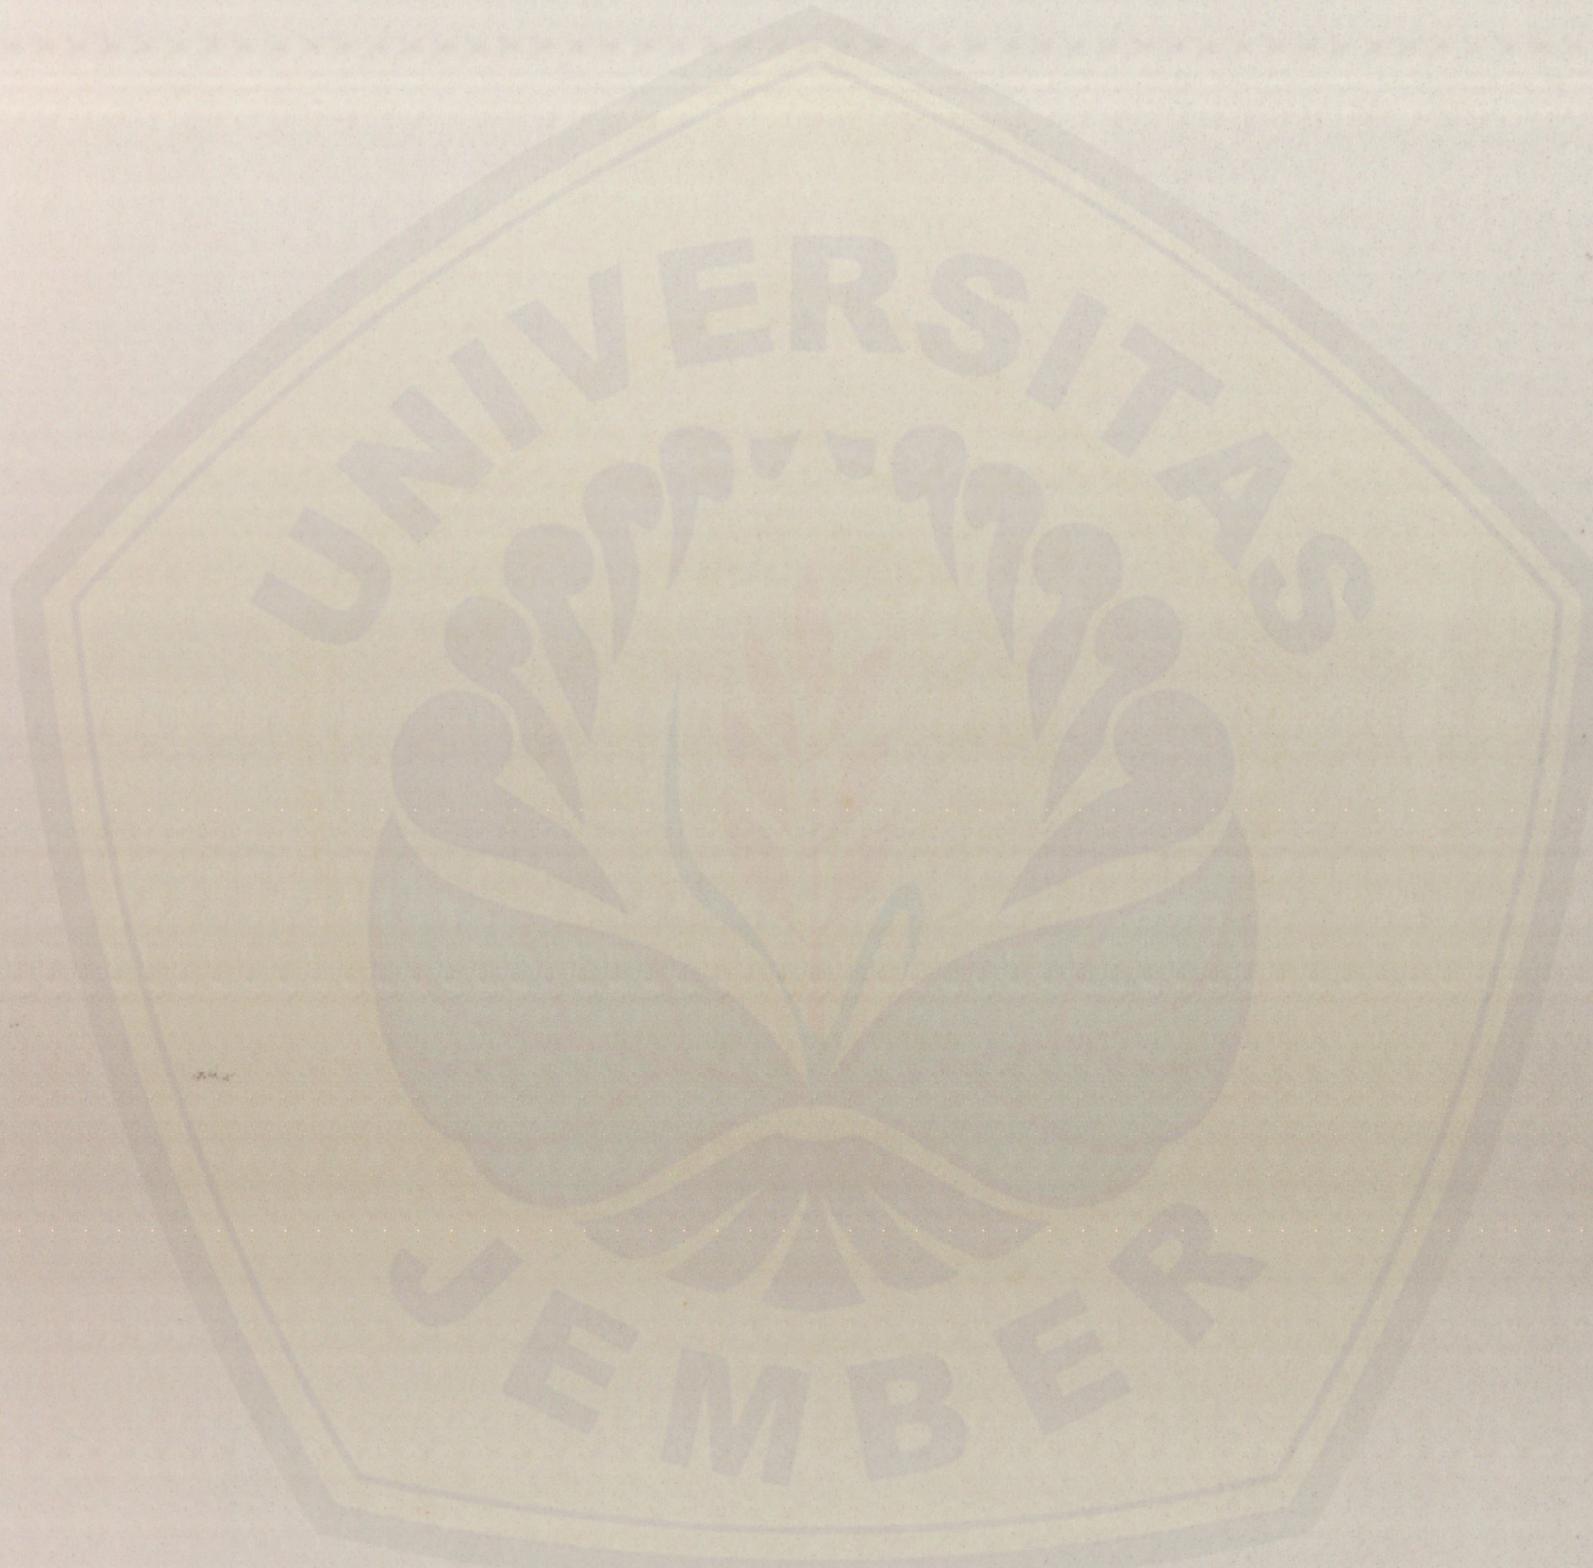

### 2.3 Types of Indonesian Idiomatic Expression

Chaer (1986:8) explains that Indonesian also has two types of idiom. In the total idiom, the meaning of the element becomes a unity, so each word loses its lexical meaning. For example, *batu loncatan*, it has the same meaning as a *stepping stone*, there is no connection between *batu loncatan* with *batu* or *loncatan*. Other examples, *duri dalam daging* (*a thorn in the flesh*), *biji mata* (*the apple of one's eye*), etc.

In partial idiom, one of the elements has a lexical meaning, while the other has a peculiar meaning, for examples; *daftar hitam*, *perang dingin*, and *koran kuning*. The examples respectively have the same meaning as the English idioms of; *a black list*, *(the) cold war*, and *(the) yellow press*.

Based on Palmer and Chaer's statements it can be concluded that English and Indonesian have two types of idiom, total and partial. Some of

Indonesian idioms are similar to English idioms, such as *daftar hitam* with a *black list*, *(the) cold war* with *perang dingin*, *batu loncatan* with a *stepping stone*, etc. This thesis is going to discuss both, total and partial idioms.

## CHAPTER III

### RESEARCH METHODOLOGY

#### 3.1 Data Collection

There are some methods that can be used to collect data, such as interview, questionnaire, observation, library research, and so forth (Keraf, 1997:60). The data of the thesis are gathered by using library research. It means that the data will be taken from the library, not from the field. The data will be obtained from some books and dictionaries which are related to idiomatic expressions both in English and Indonesian.

#### 3.2 Type of Data

The type of data that will be used in the thesis is qualitative data. Qualitative data are the data that are not in the form of number, so the data in the form of word or group of words. They are English and Indonesian idiomatic phrases that are taken from some books.

#### 3.3 Type of Analysis

The thesis uses a comparative method. Comparison is a way to show the similarities and differences between two or more objects by using certain principles (Keraf, 1982:60). He remarks that there are three purposes of method of comparison, they are:

- a) to inform something, by connecting with other object which has been known. In other words, this purpose is to introduce object X that has not been known yet by comparing with object Y that has been known.
- b) to convey two or more objects by connecting with the general principle. It means that object X and Y (or more) are the objects that

have not been known yet and will be introduced to the readers, while object Z is the object that has been known as the general principle.

- c) to compare two or more objects that have been known to convey the general principle. In this case, factors X and Y (or more) are the factors that have been known and Z is the general principle from those factors.

The researcher can choose one of the purposes of comparative method to give an explanation to the readers. This thesis will use the third purpose. This thesis is going to compare English and Indonesian idiomatic expressions that have been well known by the readers to find out the similarities and differences between them.

## CHAPTER IV RESULT AND DISCUSSION

This chapter will analyze 94 idioms that consist of 47 English and 47 Indonesian idiomatic phrases. They are in type of Noun Phrases (NP), Verb Phrases (VP), Adjectival Phrases (AP), Prepositional Phrases (PP), and Adverbial Phrases (Adv P).

### 4.1 The Type of Idiomatic Phrases

#### 4.1.1 Noun Phrases (NP)

This type consists of 12 English idiomatic Noun Phrases (number 1a, 1b, 1c, - 7) and Indonesian idiomatic Noun Phrases (number 1a, 1b, 1c, 2, 3a, 3b, 4, 5, 6, 8, - 13 )

##### 1a. *a stepping stone*

The meaning of *a stepping stone*:

a job/position/success which helps towards something higher or better in someone's profession, social status, or educational level (Seidl and McMordie, 1988:76).

English	Indonesian
<i>a first stepping stone on the path to success</i> (Hornby, 1994:1258)	Usahanya kini hanya merupakan <i>batu loncatan</i> untuk mencapai usaha yang lebih baik (Mahayana, et. al., 1997:40)

The structure:

$NP \rightarrow D \ N'$

$N' \rightarrow A \ N$

The structure:

$NP \rightarrow N \ N$

1b. *a black list*

The meaning of *a black list*:

a list of person who are considered to be dangerous/undesirable/disloyal etc (Seidl and McMordie, 1988:203).

English

Indonesian

He knows that his name  
is on *the black list*, so he  
may try to enter the country  
using a false passport.(Seidl  
and McMordie, 1988:203)

The structure:

$NP \rightarrow D \ N'$

$N' \rightarrow A \ N$

The structure:

$NP \rightarrow N \ A$

1c. *a blue film*

The meaning of *a blue film*:

a pornographic film (Seidl and McMordie, 1988:204).

English

Indonesian

There has been a  
considerable rise in the  
production of *blue film*  
since video recorders  
came on the market.(Seidl  
and McMordie, 1988:204)

The structure:

$NP \rightarrow D \ N'$

$N' \rightarrow A \ N$

*Film porno sebaiknya jangan  
dipertontonkan pada anak kecil.*

The structure:

$NP \rightarrow N \ A$

1d. *a low profile*

The meaning of *a low profile*:

quiet behaviour which does not arouse attention or attract notice

(Seidl and McMordie, 1988:71)

English

Indonesian

You should keep *a low profile*.  $\Rightarrow$  AP

In Indonesian this expression is included into Adjectival Phrase

The structure:

NP  $\rightarrow$  D N'

N'  $\rightarrow$  A N

1e. *a bitter pill*

The meaning of *a bitter pill*:

something that is unpleasant or difficult to accept, e. g. disappointment, defeat, rejection, setback, refusal, etc (Seidl and McMordie, 1988:64).

English

Indonesian

It was a very *bitter pill*

$\Rightarrow$  VP

for Mary to swallow when her boyfriend fell in love with her closefriend.

In Indonesian this expression is included into Verb Phrase

The structure:

NP  $\rightarrow$  D N'

N'  $\rightarrow$  A N

2. *a puppy love*

The meaning of *a puppy love*:

immature infatuation of an adolescent (Homby, 1994:1014).

English	Indonesian
He is mad about his biology teacher, but it is only a <i>puppy love</i> (Homby, 1994:1014)	Kalau bertemu Indra, aku teringat kisah cinta monyet kami dulu.

The structure:

$$\begin{array}{l} \text{NP} \rightarrow \text{D} \ N' \\ \text{N}' \rightarrow \text{N} \ N \end{array}$$

### 3a. *the law of the jungle*

The meaning of *the law of the jungle*:

the principle that the strongest and most unscrupulous will survive and do well in a competitive situation (Seidl and McMordie, 1988:60).

English	Indonesian
It is all very well having a degree in business administration, but you do not learn <i>the law of the jungle</i> at university. (Seidl and McMordie, 1988:60)	<i>Hukum rimba</i> masih sering terjadi di ibu kota kita (Chaer, 1986:75).

The structure:

$$\begin{array}{l} \text{NP} \rightarrow \text{D} \ N \ PP \\ \text{PP} \rightarrow \text{P} \ NP \\ \text{NP} \rightarrow \text{D} \ N \end{array}$$

### 3b. *a thorn in the flesh*

The meaning of *a thorn in the flesh*:

something or someone that is a source of annoyance/distaste/trouble for someone (Seidl and McMordie, 1988:63).

English	Indonesian
<p>He has been a <i>thorn</i>  <i>in my flesh</i> eversince he  joined this department.  (Hornby,1994:1014).</p>	<p>Perasaanku mengatakan bahwa  Roni dapat menjadi <i>duri dalam</i>  <i>daging</i> keluargamu.</p>

The structure:

NP → D N PP

PP → P NP

NP → D N

The structure:

NP → N PP

PP → P N

### 4. *the apple of one's eye*

The meaning of *the apple of one's eye*:

person or thing that is loved more than any other (Hornby, 1994:47).

English	Indonesian
<p>She is <i>the apple of her father's eye</i> (Hornby:1994: 47)</p>	<p>Dia adalah <i>buah hati</i> kedua orang tuanya.</p>

The structure:

NP → D N PP

PP → P NP

NP → Pro N

The structure:

NP → N N

5. *someone's right hand man*

The meaning of *someone's right hand man*:

*someone's closest assistant/helper* (Seidl and McMordie, 1988: 224).

English	Indonesian
Mary has been the headmaster's right hand man for years. (Seidl and McMordie, 1988:224)	Dia menjadi tangan kanan pemimpinnya.

The structure:

$$\text{NP} \rightarrow \text{Pro N'}$$

$$\text{N'} \rightarrow \text{N' N}$$

$$\text{N'} \rightarrow \text{A N}$$

The structure:

$$\text{NP} \rightarrow \text{N A}$$

6. *crocodile tears*

The meaning of *crocodile tears*:

insincere tears for effect only (Seidl and McMordie, 1988:199).

English	Indonesian
She shed crocodile tears when she dismissed him for his job( Hornby, 1994:283).	Jangan mengeluarkan air mata buaya di sini, aku sudah tahu siapa kamu (Chaer, 1986:15).

The structure:

$\text{NP} \rightarrow \text{N N}$

$\text{NP} \rightarrow \text{N' N}$

$\text{N'} \rightarrow \text{N N}$

7. *a slip of the tongue*

The meaning of *a slip of the tongue*:

error in writing or speaking (Hornby, 1994:1200).

English	Indonesian
I did not want to say that.	$\Rightarrow VP$
It was a <i>slip of the tongue</i> .	In Indonesian this expression is included into Verb Phrase

The structure:

NP → D N PP

PP → P NP

NP → D N

8. *tangan pertama*

The meaning of *tangan pertama* is the same as *at first hand*.

English	Indonesian
$\Rightarrow PP$	Saya mendengar berita itu dari <i>tangan pertama</i>
In English this expression is included into PP	
The structure: NP → N A	

9. *lampu hijau*

The meaning of *lampu hijau* is permission to do something.

English	Indonesian
$\Rightarrow VP$	Dia telah mendapat <i>lampu hijau</i>
In English this expression is included into VP	dari orang tuanya untuk bekerja di luar negeri.

The structure:

NP → N A

#### 10. *kehilangan muka*

The meaning of *kehilangan muka* is the same as *lose face*.

English	Indonesian
→ VP	Ia jadi <i>kehilangan muka</i> karena
In English this expression is included into VP	ternyata yang diejeknya tadi adalah dosen barunya.

The structure:

NP → N N

#### 11. *ketinggalan jaman*

The meaning of *ketinggalan jaman* is the same as *out of date*.

English	Indonesian
→ PP	Dia selalu mengenakan pakaian
In English this expression is included into PP	yang sudah <i>ketinggalan jaman</i> .

The structure:

NP → N N

#### 12. *omong kosong*

The meaning of *omong kosong* is the same as *big talk*.

English	Indonesian
→ AP	<i>Omong kosong</i> kau dapat
In English this expression is included into AP	melompat setinggi itu (Mahayana, et. al., 1997:221)

The structure:

$NP \rightarrow N \ A$

### 13. *darah biru*

The meaning of *darah biru* is the same as *blue blood*.

English	Indonesian
$\Rightarrow AP$	Meskipun masih tergolong
In English this expression is included into AP	<i>darah biru</i> , dia tidak bersikap angkuh.

The structure:

$NP \rightarrow N \ A$

### 4.1.2 Verb Phrases (VP)

This type consists of 22 English idiomatic Verb Phrases (number 1a, 1b, 1c, - 13) and 22 Indonesian idiomatic Verb Phrases (number 1, 2, 4, 5b, 6a, 6b, 7, 8, - 16)

#### 1a. *shut one's eyes*

The meaning of *shut one's eyes*:

refuse to see or take notice of something (Hornby, 1994:429)

English	Indonesian
She <i>shut her eyes</i> to her husband's infidelities (Hornby, 1994:429)	Pengusaha sukses itu <i>menutup mata</i> terhadap kemiskinan yang ada di daerahnya.

The structure:

$VP \rightarrow V \ NP$

$NP \rightarrow Pro \ N$

The structure:

$VP \rightarrow V \ N$

**1b. wash one's hands**

The meaning of *wash one's hands*:

### 3. Separable phrases

Some of English idiomatic phrases are separable phrases, but there are no separable phrases in Indonesian idiomatic phrases.

#### a. separated by adjective

English	indonesian
a stepping stone	batu loncatan
↓	↓
a first stepping stone	----batu loncatan
an important stepping stone	
make sense	masuk akal
↓	↓
make good sense	masuk ----akal

#### b. separated by negative

English	indonesian
make sense	masuk akal
↓	↓
make no sense	masuk ----akal

#### c. separated by pronoun

English	Indonesian
lose face	kehilangan muka
↓	↓
lose his/her/their face	kehilangan-----muka

d. separated by adverb

English	Indonesian
<i>a bitter pill</i>	<i>menelan pil pahit</i>
↓	↓
<i>a very bitter pill</i>	<i>menelan-----pil pahit</i>

#### 4. Substitutable Phrases

Some of English and Indonesian idiomatic phrases are substitutable phrases.

a. head substitution

English	Indonesian
<i>shut one's eye</i>	<i>menutup mata</i>
↓	↓
<i>close one's eyes</i>	<i>----- menutup mata</i>
<i>red in the face</i>	<i>merah muka</i>
↓	↓
<i>get a red face</i>	<i>----- merah muka</i>
<i>be of age</i>	<i>cukup umur</i>
↓	↓
<i>come of age</i>	<i>----- cukup umur</i>
<i>at the crack dawn</i>	<i>pagi-pagi buta</i>
↓	↓
<i>at the break of dawn</i>	<i>----- pagi-pagi buta</i>

Indonesian idiomatic phrases- *menutup mata*, *merah muka*, *cukup umur*, and *pagi-pagi buta* which have the same meaning to English idiomatic phrases above, are not substitutable phrases.

Indonesian	English
<i>mengambil nafas penghabisan</i>	<i>breathe one's last</i>
↓	↓
<i>menghembuskan nafas penghabisan</i> ----	<i>breathe one's last</i>
<i>keseleo lidah</i>	<i>a slip of the tongue</i>
↓	↓
<i>tergelincir lidah</i>	--- <i>a slip of the tongue</i>
<i>cuci tangan</i>	<i>wash one's hands</i>
↓	↓
<i>membersihkan tangan</i>	---- <i>wash one's hands</i>
<i>buku hitam</i>	<i>a black list</i>
↓	↓
<i>daftar hitam</i>	<i>a black list</i> -----
<i>berpindah tangan</i>	<i>change hands</i>
↓	↓
<i>berganti tangan</i>	----- <i>change hands</i>

*unjuk gigi*

*memperlihatkan gigi*

*show one's teeth*

----- *show one's teeth*

*buah mata*

*biji mata*

*apple of one's eye*

----- *apple of one's eye*

English idioms which have the same meaning to Indonesian idioms above (*breathe one's last, wash one's hands, a black list, change hands, show one's teeth, the apple of one's eye*) are not substitutable phrases.

*Keseleo lidah* is head substitution and *a slip of the tongue* is modifier substitution. Substitutable phrases means phrases that can be substituted one of their part.

When the head word of the phrase can be substituted, it is called head substitution. It is called modifier substitution when the modifier can be substituted.

#### b. modifier substitution

English

*a blue film*

*a blue movie*

Indonesian

*film pomo*

*film pomo*

*a thorn in the flesh*

*a thorn in one's side*

*a thorn in one's flesh*

*duri dalam daging*

*duri dalam daging*

*catch someone in the act*      *menangkap basah*

↓                          ↓

*catch someone red handed*      *menangkap basah-----*

*die a natural death*      *mati seajal*

↓                          ↓

*die in one's bed*      *mati seajal-----*

*a slip of the tongue*      *keseleo lidah*

↓                          ↓

*a slip of the pen*      *keseleo lidah-----*

Indonesian idiomatic phrases (*film biru*, *duri dalam daging*, *menangkap basah*, *mati seajal*, *keseleo lidah*) which have the same meaning to English idiomatic phrases above are not substitutable phrases.

Indonesian

English

*di belakang layar*      *behind the scenes*

↓                          ↓

*di belakang panggung*      *behind the scenes-----*

*di depan hidung*      *under one's nose*

↓                          ↓

*di depan mata*      *under one's nose-----*

*berdarah biru**blue blood**berdarah putih**blue blood----**berhati emas**have a heart of gold**berhati berlian**have a heart of gold----**jatuh cinta**fall in love**jatuh hati**fall in love----**masuk akal**make sense**masuk angan**make sense----*

English idiomatic phrases which have the same meaning to Indonesian idiomatic phrases above are not substitutable phrases.

5. Other difference between English and Indonesian idiomatic phrases is the verb in Idiomatic Verb Phrases. The English verb has different forms (present tense, simple past, present perfect) so the verb in English idiomatic Verb phrases can be changed into other forms depending on the tenses.

For example:

The Present Tense

English : I wash my hands of the sordid business.

Indonesian: Saya cuci tangan atas bisnis kotor itu.

The Simple Past

English : Last year I washed my hands of the sordid business.

Indonesian : Tahun lalu saya cuci tangan atas bisnis kotor itu.

The Present Perfect

English : I have washed my hands of the sordid business

Indonesian: Saya telah cuci tangan atas bisnis kotor itu.

The verb in Indonesian idiomatic Verb Phrases does not change in different form of tense.

#### 4.3 The Similarities between English and Indonesian Idiomatic Phrases

1. Based on the previous discussion, it could be concluded that there are only 4 English and Indonesian idiomatic phrases which have the same types and structures of phrase, they are:

English	Indonesian
a. change hands (VP)	a. berpindah tangan (VP)
VP → V N	VP → V N
b. make sense (VP)	b. masuk akal (VP)
VP → V N	VP → V N
c. think twice (VP)	c. berpikir dua kali (VP)
VP → V Adv	VP → V Adv

d. under age (PP)

$PP \rightarrow P \ N$

d. di bawah umur (PP)

$PP \rightarrow P \ N$

2. The second similarity is about substitutable phrases.

a. Head substitution

The head words of English and Indonesian idiomatic phrases below can be substituted, they are:

English

*rack one's brain*

*beat one's brain*

*prick up one's ears*

*give an ears*

Indonesian

*memeras otak*

*memutar otak*

*memasang telinga*

*membuka telinga*

b. modifier substitution

English and Indonesian idiomatic phrase below is modifier substitution.

English

*try one's luck*

*try one's fortune*

Indonesian

*mengadu nasib*

*mengadu untung*

## CHAPTER V CONCLUSION

In accordance with the title, this thesis observes the similarities and differences between English and Indonesian idiomatic expressions. After the data have been collected, they are analyzed by using comparative method, and then it can be drawn some conclusions.

Based on 47 idioms of each language which had been compared in the previous chapter, it can be concluded that there are 6 structures of English idiomatic Noun Phrase, 13 structures of English idiomatic Verb Phrase, 8 structures of English idiomatic Prepositional Phrase, 2 structures of English idiomatic Adjectival Phrase, and 4 structures of Indonesian idiomatic Noun Phrase, 5 structures of Indonesian idiomatic Verb Phrase, 1 structure of Indonesian idiomatic Prepositional Phrase, 2 structures of Indonesian idiomatic Adjectival Phrase, and 2 structures of Indonesian idiomatic Adverbial Phrase.

- a) The most common structure of English idiomatic Noun Phrase is Determiner followed by Noun Phrase or Noun Bar, such as *the law of the jungle*, *a stepping stone*, *a blue film*, etc. The structure of Indonesian idiomatic Noun Phrase is Noun followed by Noun, Adjective, or Prepositional Phrase, such as *cinta monyet*, *daftar hitam*, *duri dalam daging*, etc.
- b) The most common structure of English idiomatic Verb Phrase is Verb followed by Noun or Noun Phrase, such as *make sense*, *get the green light*, *wash one's hands*, etc. The most common structure of Indonesian idiomatic Verb Phrase is Verb followed by Noun, such as *masuk akal*, *makan angin*, etc.

c) The most common structure of English idiomatic Prepositional Phrase is Preposition followed by Noun Phrase, such as *in the twinkling of an eye*, *behind the scenes*, etc. The structure of Indonesian idiomatic Prepositional Phrase is Preposition followed by Noun, such as *di bawah umur*, *di belakang layar*, etc.

d) Adjectival Phrases

Based on the previous chapter, there are only two structures of English idiomatic Adjectival Phrases. Adjective followed by Noun or Prepositional Phrase, such as *blue blood*, *red in the face*. The most common structure of Indonesian idiomatic Adjectival Phrase is Preposition followed by Noun, such as *cukup umur*, *rendah hati*, etc.

e) Adverbial Phrase

Based on the previous chapter, it can be concluded that there is no English idiomatic Adverbial Phrase and there are two structures of Indonesian idiomatic Adverbial Phrases. The structure of Indonesian idiomatic Adverbial Phrase is Adverb followed by Noun or Adjective, such as *sekejap mata*, *pagi-pagi buta*, etc.

The idiomatic phrases that have been compared in this thesis are English and Indonesian Idioms which have the same meanings. The first difference is some of them have different types of phrase so the structures are different too. One of them is *out of date* is Prepositional Phrase (PP) and *ketinggalan jaman* is Noun Phrase (NP). The structure:

*out of date*

PP → P N

*ketinggalan jaman*

NP → N N

The second difference, some of English and Indonesian idiomatic phrases have the same types of phrase but different structures, for example, a *black list* has the same meaning as *daftar hitam* and they also belong to the

same type of phrase -Noun Phrase (NP), but their structures are different. The structure:

*a black list*

NP → D N'

N' → A N

*daftar hitam*

NP → N A

The third difference between English and Indonesian idioms is that there are some separable phrases in English idioms, but it cannot be found in Indonesian idioms. As an example, the idioms *make sense* can be separated by negative or adjective, so it becomes *make no sense* or *make good sense*. Indonesian idiom which has the same meaning to it, *masuk akal*, cannot be separated by other words.

Other difference is about substitutable phrase. In some cases, English idiomatic phrases are substitutable phrases while Indonesian idiomatic phrases are not substitutable phrases. In English idiom, *red in the face* becomes *get a red face*, while *merah muka* cannot be substituted by other word. On the other hand, some of Indonesian idiomatic phrases are substitutable phrases while English idiomatic phrases are not substitutable phrases.

The last difference between them is the verb in Verb Phrases. The verb in English idiomatic Verb Phrases can be changed into other form depending on the tenses while the verb in Indonesian idiomatic Verb Phrases does not change.

The similarity between some of the English and Indonesian Idiomatic phrases is that they have the same types of phrase and structures. They are:

- *think twice*

VP → V Adv

*berpikir dua kali*

VP → V Adv

- *make sense*

VP → V N

*masuk akal*

VP → V N

- *change hands* *pindah tangan*  
VP → V N      VP → V N
- *under age* *di bawah umur*  
PP → P N      PP → P N

Other similarity between some of the English and Indonesian idiomatic phrases, both are substitutable phrases. In English idiom, *rack one's brain* becomes *beat one's brain*. It is the same as Indonesian idiom *memeras otak* becomes *memutar otak*.

It is obvious that there are similarities and differences between English and Indonesian idiomatic expressions.
