ABSTRACT

Saat ini tidak semua pasien sumbing memiliki kartu gratis layanan BPJS. Sehingga masih banyak kasus sumbing bibir dan langit-langit yang belum teratasi. Adanya operasi gratis sumbing bibir dan langit-langit sangat membantu dan memberikan harapan bagi para orangtua dalam mengatasi permasalahan yang dihadapi. Penelitian ini bertujuan mengkaji makna persepsi orang tua dengan anak sumbing bibir dan langit-langit terhadap sistem layanan operasi gratis dibandingkan dengan layanan BPJS. Penelitian dilakukan dengan desain fenomenologi dengan partisipan yang terlibat adalah dua orang tua dengan anak yang sudah menyelesaikan semua tahap operasi sumbing bibir dan langit-langit dengan layanan operasi gratis SMILE TRAIN dan dua orang tua yang anaknya mendapatkan layanan operasi dengan BPJS. Teknik pengambilan data menggunakan wawancara mendalam dengan menggunakan pertanyaan semi-terstruktur. Hasil penelitian menunjukkan bahwa operasi gratis memiliki beberapa kelebihan terkait hal berikut ini: 1) kemudahan akses layanan operasi; 2) biaya gratis; 3) pendampingan keluarga; 4) kenyamanan pelayanan; dan 5) adanya ketenangan dan kepuasan batin. Kesimpulan penelitian bahwa layanan operasi gratis memiliki nilai positif bagi orang tua penderita dibandingkan dengan program BPJS sehingga layanan ini dapat menjadi salah satu alternatif untuk mempercepat penanganan sumbing bibir dan langit-langit khususnya pada penderita yang tidak mampu secara ekonomi dalam melakukan tindakan operasi.

KATA KUNCI: *BPJS, Operasi gratis, Smile Train, Sumbing bibir dan langit-langit, fenomenologi*
