Paper #	Paper Title / Author	Downloads	Photo
1	Influence of Surface Conditioning of Different Core Materials on Bonding to Glass Ceramic Mahmoud Mohamed , Ahmed Attia, Mohamed El Layeh Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 01-04 Download Complete Paper Certificate DOI : 10.35629/5252-05060104	126	
2	Influence Of Impacted Lower Third Molar Teeth On Teeth Crowding Shahi Jahan Shah , Hassan Ali Jaber Alshehri,Ashfaq Yaqoob , Shafaitullah Khateeb Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 05-08 Download Complete Paper Certificate DOI : 10.35629/5252-05060508	75	
3	Accuracy of Tirads Classification System in the Risk Stratification of Thyroid Swellings Dr Sunkara Navya Sai Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 09-15 Download Complete Paper Certificate DOI : 10.35629/5252-05060915	80	
4	Industrial Report Sarwatkika Pal Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 16-20 Download Complete Paper Certificate DOI : 10.35629/5252-05060915	50	
5	Comparative Evaluation of Accuracy of Newer Generation Apex Locator with Conventional Radiographic Method to Determine Working Length in Presence of Various Intracanal Irrigants An In vivo Study Dr. Saloni Sinha , Dr. B.S. Keshava Prasad , Dr.Murali H Rao , Dr. Karanam Apoorva Prakash Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 21-28 Download Complete Paper Certificate DOI : 10.35629/5252-05062128	71	
6	Bond Strength to Zirconia Reinforced Machinable Glass Ceramic Influence of Different Conditioning Protocols Hayder Radhi, Ahmed Attia, Nesma Mohammed Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 29-43 Download Complete Paper Certificate DOI : 10.35629/5252-05062943	42	
7	Evaluation of Erythropoiesis after Renal Transplantation, a prospective observational study XXXX Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 44-49 Download Complete Paper Certificate DOI : 10.35629/5252-05064449	58	
8	Cone Beam Computed Tomography A trump card in restorative dentistry Dr. Jetti Manogna, Dr. Sophia Thakur, Dr. Rahul Gupta Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 50-57 Download Complete Paper Certificate DOI : 10.35629/5252-05065057	74

Publish Notification: Within 24 Hours

9	<p>XXXX XXXX</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 58-61</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-05065861</p>	43	
10	<p>Assessment of Development and Use of Technological Skills and Usage of different IT applications amongst Dental Undergraduates in Dental Institutions across Pune, India</p> <p>Dr. Renuka Nagarale, Dr. Neetu Kadu, Saqib Khan, Rifa Ansari, Zaid Chaudhary</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 62-73</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-05066273</p>	33	
11	<p>Awareness Level of Diabetic Neuropathy and Its Complications among Bengaluru City Population</p> <p>Sudhakara P M, Dr Deepak Tiwari, Dr Prem Kumar. B. N</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 74-79</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-05067479</p>	38	
12	<p>Role of 4 Plants in Oral Health A Review</p> <p>Dr Reema Sharma</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 80-90</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-05068090</p>	40	
13	<p>Questionnaire Study on Impact of Diet and Lifestyle Trends in Oral Health among General Population</p> <p>M.A.Eswaran,Yamini.V,Sandhya.D, Shyaame M, Srinath</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 91-97</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-05069197</p>	38	
14	<p>A case report on Scrub typhus in second trimester of pregnancy leading to multi organ dysfunction</p> <p>Dr.Usha Rani, Dr.Pranathi Reddy</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 98-100</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-050698100</p>	42	
15	<p>Injury Mechanisms and Patterns in Trauma Patients Presenting to the Emergency Department</p> <p>XXXX</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 101-104</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506101104</p>	45	
16	<p>Clinic bacteriological Profile of Spontaneous Bacterial Peritonitis in Cirrhosis A Cross Sectional Study Conducted in a Tertiary Care Centre in Thrissur</p> <p>Dr.Radhika M, Dr.Bilha Saju</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 105-116</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506105116</p>	40	
17	<p>Effect of Simulated Intra oral Adjustment on Contrast Ratio of Multi layered Zirconia Restorations</p> <p>Reham Ghanem , Ahmed Adel,Walid Abdelghafar Alzordok</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 117-122</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506117122</p>	34	
18	<p>Diagnostic Accuracy of DWI in Malignant Liver Lesions</p> <p>Dr Gayathri N S</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 123-127</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506123127</p>	26	
19	<p>Antibiotic Susceptibility Profile of Uropathogens in Pregnant Women with Asymptomatic Bacteriuria</p> <p>Dr Harvick P Gowda</p> <p>Volume 5, Issue 6, Nov-Dec 2023, Page No : 128-138</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506128138</p>	35	

20	<p>Wonders of Semilunar Flap in Gingival Recession A Case Report Dr. Aditi Bhalla, Dr. Shailendra singh chauhan Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 139-140 Download Complete Paper Certificate DOI : 10.35629/5252-0506139140</p>	42	
21	<p>Allergies aux latex ET produits d hygiene chez le personnel de sante Brahimi G., Ait seddik S., Slaouti S., Chabane K., Larinouna A., Boudebouz Z., Charchari M. Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 141-147 Download Complete Paper Certificate DOI : 10.35629/5252-0506141147</p>	29	
22	<p>Corticobasal Implants with Immediate Loading A Systematic Overview Dr.Girija R Giri,Dr. Apoorva.D.G, Dr. Bindu S Patil, Dr. Jyothi Patil Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 148-151 Download Complete Paper Certificate DOI : 10.35629/5252-0506148151</p>	35	
23	<p>Urinoma Spontaneous Rupture of Renal Pelvis Dr. Vishal Gautam , Dr. Arvind Mehra Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 152-153 Download Complete Paper Certificate DOI : 10.35629/5252-0506152153</p>	31	
24	<p>A Comparative Evaluation of Remaining Dentin Thickness Following Instrumentation of Teeth Using Different Rotary File Systems An In Vitro Study Dr. Sushma k, Dr. B.S.Keshava Prasad, Dr.Tarun G S , Dr. Rashmi shetty Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 154-162 Download Complete Paper Certificate DOI : 10.35629/5252-0506154162</p>	30	
25	<p>Apogeotropic variant of nystagmus in a post vaginal hysterectomy patient A case report Dr.Divya Joy, Dr.Ayushi Agarwal, Dr.Anusha Stani, Dr.Vikas Kakkar, Dr .Akriti Sharma, Dr .Khushboo A Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 163-167 Download Complete Paper Certificate DOI : 10.35629/5252-0506163167</p>	30	
26	<p>A Clinical Profile of Patient Admitted with Hypertensive Emergencies Presenting to the Emergency Medicine A Cross Sectional Study Dr G.C. Vardhan Reddy , Dr A Naga Sowmya , Dr A Krishna Shima Reddy , Dr Nithya K , Dr Ts.E.Joy Bles Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 168-176 Download Complete Paper Certificate DOI : 10.35629/5252-0506168176</p>	41	
27	<p>An in vivo comparative evaluation of antibacterial efficacy of Sodium hypochlorite, Triphala, and Turmeric against microorganisms in root canal disinfection Sayali Kamat Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 177-182 Download Complete Paper Certificate DOI : 10.35629/5252-0506177182</p>	34	
28	<p>An Observational Study on Cadaver to Elicit the Variability of Palmaris Longus Muscle in Either Sexes Dr Sarmistha Chakraborty, Dr Barnali Mukherjee, Dr Ankur Bhattacharya, Dr Nabanita Chakraborty Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 183-185 Download Complete Paper Certificate DOI : 10.35629/5252-0506183185</p>	29	
29	<p>Challenges faced by Undergraduate Dental students with regards to emotional and psychological health in COVID 19 pandemic A Questionnaire Based Study Taniya Tirpude , Jyoti Khade , Esha Gharpure Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 186-194 Download Complete Paper Certificate DOI : 10.35629/5252-0506186194</p>	55	
30	<p>The Impact of Different Surface Coatings on Roughness, Fluoride Release and micromorphology analysis from Resin Modified and Glass Ionomer Restorations (Review of literature) Mohanad H Alebody,Hamdi H Hamama,Salah H Mahmoud Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 195-201 Download Complete Paper Certificate DOI : 10.35629/5252-0506195201</p>	31	

31	<p>In Vitro Evaluation of Color and Contrast ratio of Different Lithium Disilicate Ceramics thesis</p> <p>Mohamed Khaled Abass Abdelrahman, Dr. Amal Abdelsamad Sakrana, Dr. Essam Aziz Khedr</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 202-205</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506202205</p>	41	
32	<p>Neglected Talar Fracture Dislocations Case Series</p> <p>Jeremy Bliss</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 206-212</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506206212</p>	33	
33	<p>Odontogenic Myxoma A Case report and Literature review</p> <p>Dr.Pankhuri Pande, Dr.Rajeshree Gondhalekar, Dr.Nitin Adwani, Dr.Milind Naphade, Dr.Vivek Kolhe, Dr</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 213-219</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506213219</p>	30	
34	<p>Fissural cyst of oral facial region overview</p> <p>Rishikesh.R, Sanjay Kumar .M ,Suseendran.M, Dr.Balasankari .K , Dr.Arunachalam .M, Dr. Sathish Kuma</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 220-234</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506220234</p>	31	
35	<p>Hybrid abutment crown with offset implant placement Effect of different machinable crown material on torque loss</p> <p>Dr. Hemangi Sawant</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 235-242</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506235242</p>	34	
36	<p>Comparative assessment of awareness about pediatric oral health and treatment in parents from urban and rural areas in Karad, Maharashtra.</p> <p>Dr. Hemangi Sawant, Dr. Namrata Gaonkar, Dr. Shashikiran N.D., Dr. Sachin Gugawad, Dr. Savita Hadaka</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 243-248</p> <p>Download Complete Paper Certificate</p>	34	
37	<p>Complex Elbow Trauma Ten Year Retrospective Analysis</p> <p>Anand Ashok , Krupakaran Ganesan , Jeremy Bliss</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 249-252</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506249252</p>	68	
38	<p>Fracture resistance of premolars treated with endodontic therapy and repaired with various pressable and machinable ceramic overlays literature review</p> <p>Mohammed Marhab, Hamdi H Hamama, Salah H Mahmoud.</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 253-258</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506253258</p>	31	
39	<p>Subjective Analysis of Oral Mucosal Tissue Lesions. Oral mucosal Assessment Among the NCC Cadets of Bhopal Group</p> <p>Abhisht Asthana, Dr. Rashmi Sathe, Dr. Sahana S, Dr. Shubhangi Mhaske, Dr. Santosh Singh</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 259-261</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506259261</p>	40	
40	<p>Effects of Upperlimb Rehabilitation on improve motor function and self care activities among affected upper limb post stroke patients at SRM Neuro OPD, Kattankulathur</p> <p>Dr. Shaini. G.S.M, Sc (N), PhD, Mrs. Ambiga. K .M, Sc(N), Mrs. Suganthi. K. M, Sc(N).</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 262-269</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506262269</p>	27	
41	<p>Dental Robotics A Paradigm shift</p> <p>Dr. Anshu vij, Dr. Sadaf, Dr. Richa Sharma</p> <p>Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 270-275</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506270275</p>	26	

42	<p>Hybrid Abutment Crown with Offset Implant Placement Effect of Different Machinable Crown Material on Torque Loss XXXX Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 276-283 Download Complete Paper Certificate DOI : 10.35629/5252-0506276283</p>	25	
43	<p>Subjective Analysis of Oral Mucosal Tissue Lesions. Oral mucosal Assessment Among the NCC Cadets of Bhopal Group Abhisht Asthana, Dr.Rashmi Sathe, Dr Sahana S,Dr ShubhangiMhaske,Dr Santosh Singh, Dr Parimala Kulka Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 284-286 Download Complete Paper Certificate DOI : 10.35629/5252-0506284286</p>	26	
44	<p>Mandibular Fracture Complications in the material of the Maxillofacial Surgery Ward of the Radom Specialist Hospital in the years 2010 2020. Maciej Podsiadlo , Jerzy Reymond Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 287-301 Download Complete Paper Certificate DOI : 10.35629/5252-0506287301</p>	27	
45	<p>Spindle Cell Lesion Ajay, D, AjayKumar,V, Shradha. R, Dr. Nila, Dr.S.Marytresa Jeyapriya, Dr. M. Sathish kumar Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 302-309 Download Complete Paper Certificate DOI : 10.35629/5252-0506302309</p>	37	
46	<p>Tangled strands A Case Study of Automatic Trichotillomania in a Female Adolescent Purushottam Singh,Dipika Vidhan, Sunil Regmi, Chandni Sharma,Dikshya Neupane Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 310-312 Download Complete Paper Certificate DOI : 10.35629/5252-0506310312</p>	30	
47	<p>Cognition and EEG Changes in Patients on Hemodialysis Food for Thought Dr. Roma Shahani, Dr. Ankit Halder, Dr.JadiSravani Yadav Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 313-314 Download Complete Paper Certificate DOI : 10.35629/5252-0506313314</p>	34	
48	<p>Prevalence of different morphological types of anemia and its significance in haemodialysis patients a unicentric study in a tertiary care hospital Hoda Arif Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 315-323 Download Complete Paper Certificate DOI : 10.35629/5252-0506315323</p>	32	
49	<p>Unveiling oral consequences A comprehensive review of immunosuppressants, adverse effects on the oral cavity Dr.Renuka Nagarale, Dr.Neetu Kadu, Nehan Shakeel Ansari, Khan Maryam Mohd Zahir, Mohsin Vaghjipurwal Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 324-331 Download Complete Paper Certificate DOI : 10.35629/5252-0506324331</p>	24	
50	<p>Evolutionary trend in smoking of health professionals at Beni Messous University Hospital Brahimi G., Larinouna A., Chabane K., Ait Seddik S., Slaouti S., Charchari M., Boudebouz A., Dahli A Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 332-339 Download Complete Paper Certificate DOI : 10.35629/5252-0506332339</p>	27	
51	<p>Worm in the head A case report of long standing Delusional Parasitosis in an elderly female Dr.Purushottam Singh, Dr.DipikaVidhan, Dr. Sunil Regmi, Dr.DikshyaNeupane, Dr.Chandni Sharma Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 340-341 Download Complete Paper Certificate DOI : 10.35629/5252-0506340341</p>	21	
52	<p>Analysis of Histopathological pattern of Thyroid lesions in a Tertiary Care Hospital of Central India. Dr. Shital Indrajeet Thorat Volume 5 , Issue 6, Nov-Dec 2023 , Page No : 342-346 Download Complete Paper Certificate DOI : 10.35629/5252-0506342346</p>	44	

53	<p>The Role of Type 17 Helper T Cells and Regulator T Cells in Human Immunodeficiency Virus (HIV) Infection A Review</p> <p>Yohana Maria Penga Volume 5, Issue 6, Nov-Dec 2023, Page No : 347-352</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506347352</p>	 <p>24</p>
54	<p>Different Behavioral Patterns in Doctor Patient Relationship</p> <p>Dr.Sagar Garg, Dr.Juhi Kaira Volume 5, Issue 6, Nov-Dec 2023, Page No : 353-370</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506353370</p>	 <p>30</p>
55	<p>The influence of social media on the sexual well being of the youth in India</p> <p>Prashant gajera (MPH) Volume 5, Issue 6, Nov-Dec 2023, Page No : 371-373</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506371373</p>	 <p>33</p>
56	<p>Evaluation of Cell Proliferation Marker MCM 3 in Salivary Adenoid Cystic Carcinoma.</p> <p>Rawda Elsheerbiny, Mona Hany Emile, Mona Mohsen Abdo Ibrahim, Lawahez El. M. Ismail Volume 5, Issue 6, Nov-Dec 2023, Page No : 374-380</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506374380</p>	 <p>24</p>
57	<p>Awareness and Attitude towards HPV Infection and Vaccination among Women in UAE</p> <p>Rajan M , Pratap S , Walton M Volume 5, Issue 6, Nov-Dec 2023, Page No : 374-379</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506374379</p>	 <p>26</p>
58	<p>Evaluating the oral side effects of immunosuppressive medications Importance of early lesion detection in dentistry.</p> <p>Dr.Neetu Kadu, Dr.Renuka Nagarale, Khan Maryam Zahir, Ansari Nehan Shakeel, Mohsin Vaghjipurwala Volume 5, Issue 6, Nov-Dec 2023, Page No : 380-389</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506380389</p>	 <p>34</p>
59	<p>Biochemical Variables in Alcoholic Liver Diseases</p> <p>Dr. M. Vasu Deva Naidupg, Drm. Indira Volume 5, Issue 6, Nov-Dec 2023, Page No : 381-382</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506381382</p>	 <p>33</p>
60	<p>Oral squamous cell carcinoma Immunohistochemical Expression of PD L1 in Oral Epithelial Dysplasia</p> <p>Eman M. Kamel, Ramy A. Abdelsalam, Doaa AM Esmail, Azza A. El Sisi Volume 5, Issue 6, Nov-Dec 2023, Page No : 383-390</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506383390</p>	 <p>26</p>
61	<p>Enhancing Maternal and Fetal Health The Perspective of Gynecologists in Pune Cityon Periodontal Disease and Pregnancy</p> <p>Dr.Renuka Nagrale, Dr.Renuka Shejul, Dr.KhushbuPandey, Dr.Sana Shaikh,Dr.Sheetal Khedkar Volume 5, Issue 6, Nov-Dec 2023, Page No : 391-395</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506391395</p>	 <p>25</p>
62	<p>Immunohistochemical study of inducible nitric oxide synthase INOS in odontogenic keratocyst and Ameloblastoma</p> <p>Amr Mustafa Kamal, Prof. Dr. Azza A. El Sissi, Prof.Sherief Youssaf Elmagdy,Dr. Mona Mohsen Volume 5, Issue 6, Nov-Dec 2023, Page No : 396-400</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506396400</p>	 <p>25</p>
63	<p>The Study of Covid 19 Infection in Pregnancy in a Government Hospital Setup in Goa</p> <p>Dr Siddhi Amonkar ; Dr Ajit Nagarsenkar Volume 5, Issue 6, Nov-Dec 2023, Page No : 401-414</p> <p>Download Complete Paper Certificate</p> <p>DOI : 10.35629/5252-0506401414</p>	 <p>39</p>

The Role of Type 17 Helper T Cells and Regulator T Cells in Human Immunodeficiency Virus (HIV) Infection: A Review

Yohana Maria Penga¹

¹Department of Oral Biology and Dental Material & Technology, University of Jember, Indonesia

Date of Submission: 15-12-2023

Date of Acceptance: 25-12-2023

ABSTRACT: The Human Immunodeficiency Virus (HIV) continues to be a major global health issue, affecting millions of individuals globally, in developing countries, specifically. HIV infection is indicated by the complex interactions between the virus and the host immune system. Among the various immune cell subsets involved, T regulatory cells (Tregs) and T helper 17 cells (Th17) play pivotal roles in preserving immunological homeostasis. This review provides a comprehensive overview of the current understanding of Treg and Th17 cell activities during HIV infection, exploring their complex interactions, how they affect immune dysregulation and disease progression, and possible therapeutic implications.

KEYWORDS: Human immunodeficiency virus (HIV); Immune system, Regulatory T cells; T helper 17; Virus

I. INTRODUCTION

The Human immunodeficiency virus (HIV) is a virus that attacks the human immune system and then causes AIDS. This virus can be passed from mother to child during childbirth and breastfeeding, as well as through sexual contact, blood transfusions, and sharing intravenous needles. HIV infection is characterized by a declining immune system, which can result in cancer, autoimmune disorders, and opportunistic infections.¹ The virus attacks vital organs in the immune system, such as T4 CD4+ macrophages and dendritic cells, causing their depletion and malfunction.²⁻⁶ Progressive disruption and massive dysregulation of the immune system in humans, particularly the loss of CD4+ T helper cells, which ultimately leads to the development of acquired immunodeficiency syndrome (AIDS).⁵⁻⁶

Under normal conditions, the human immune system fights various kinds of incoming foreign objects, including pathogens. HIV infects human immune system cells and destroys or disrupts their function. This viral infection causes a continuous decline in the immune system, resulting in immune deficiency. The immune system is

considered deficient when the system can no longer carry out its function of fighting infections and diseases. People who are immune deficient become more susceptible to various conditions, most of which rarely affect people who do not have an immune deficiency.

In HIV, several cells experience dysregulation, including regulatory T cells (Tregs)⁷ and helper T cells (Th17). Tregs are known for their immunosuppressive functions, and Th17, crucial for mucosal immunity. Therefore, Treg and Th17 cells are two distinct subsets of CD4+ T cells that can develop to promote or regulate tissue inflammation.⁸

This article will discuss the role of Tregs and Th17 cells in HIV pathogenesis, shedding light on their interactions and the consequences for the host immune response. Thus, it can increase understanding of the human immune system in abnormal conditions, especially viral infections.

II. DISCUSSION

Human Immunodeficiency Virus (HIV)

Human immunodeficiency virus (HIV) is a virus that attacks the human immune system and then causes AIDS. HIV is an RNA virus belonging to the Retroviridae family, Lentivirinae subfamily.⁹ Retroviruses can use their RNA and host DNA to form DNA viruses and are recognized during long incubation periods. Once infected with a retrovirus, this infection will be permanent for life.

HIV consists of an envelope and a core. The HIV consists of 2 sub-types, namely HIV-1 and HIV-2. HIV-1 mutates faster because it replicates more quickly.⁹ Structurally and morphologically, HIV forms consist of A cylinder surrounded by a circular fat covering. At the center of the circle is a strand of RNA. HIV has three genes, which are functional and structural components, namely gag (group antigen), pol (polymerase), and env (envelope) (See Fig.1).

HIV has a reverse transcriptase enzyme, which can change genetic information and then integrate it into the knowledge of the attacked lymphocyte cells. In this way, HIV can utilize the lymphocyte cell mechanism to copy itself into a

new virus that has the characteristics of HIV.¹⁰ HIV attacks the human immune system by attacking T helper lymphocytes with CD4 receptors on their surface. T helper lymphocytes, among other functions, produce chemicals that act as stimulants for the growth and formation of other cells in the immune system and the construction of antibodies so that not only T lymphocytes are disturbed but also B lymphocytes, monocytes, macrophages, and so on and damage the immune system.¹¹ Furthermore, it can facilitate opportunistic infections in the body. This condition is called AIDS.

Figure 1. Structure of HIV¹⁰

In its original form, HIV is an inert particle, unable to grow or injure until it enters the target cell. Therefore, the target cells of this virus, especially lymphocyte cells, have a receptor for HIV called CD-4.¹² In lymphocyte cells, the virus can develop and, like other retroviruses, can remain alive for a long time in cells in an inactive state. However, the virus in the body of a person with HIV is always considered infectious, can be active at any time, and can be transmitted during the life of the sufferer. The genetics of the infected person play an important role. Some people are immune to some strains of HIV. An example is a person with the CCR5-Δ32 mutation (a 32 nucleotide deletion in the gene encoding the chemokine receptor CCR5 that affects T cell function).¹³

The primary basis of HIV pathogenesis is the lack of helper/inducer types of T lymphocytes that contain the CD4+ marker (T4 cells). T4 lymphocytes are the central cells that directly or indirectly induce immunological functions. The decrease or loss of the cellular immune system occurs because HIV selectively infects T4 lymphocyte cells.¹⁴

HIV infects CD4 receptor molecules and chemotactic cytokines through the virus's glycoprotein, gp120.¹⁵ The mechanism of action of HIV infection is that GP 120 binds to the CD4 receptor and chemokine receptors (CXCR 4 and CCR5).¹⁶⁻¹⁷ HIV only effectively binds to this receptor and thus proves that viral infection only occurs in specific cells, for example, T helper lymphocyte cells in the human body's immunization system. Once HIV binds to the CD4 molecule and co-receptor, the virus enters, and the envelope falls off.¹² By the reverse transcriptase enzyme, RNA will be changed in shape so that it can combine with the DNA of the target cell. Furthermore, the cells that multiply will contain the virus's genetic material. HIV infection thus becomes irreversible and lasts a lifetime.

The viral DNA, which is perceived by the body as stem cell DNA, will form RNA with the facility of the stem cell, while protease enzymes will convert the mRNA in the cytoplasm into HIV particles. The particle then takes the envelope of the stem cell material to be released as another HIV.¹⁸ This mechanism in the immune system (immunosuppression) will cause a reduction and disruption of the number and function of T lymphocyte cells.

At the start of infection, HIV does not immediately cause the death of the infected cells but first undergoes replication (doubling) so that there is an opportunity to develop in the sufferer's body, which will gradually deplete or damage up to a certain number of T4 lymphocyte cells. After several months to several years, the sufferer will show clinical symptoms as a result of the HIV infection.

Regulatory T-cells (Tregs)

The immune system has regulatory mechanisms that prevent sustained inflammatory responses and attacks on healthy tissue. Regulatory T lymphocytes are a subset of CD4+ T cells that suppress immune responses and maintain self-tolerance.¹⁹ Most of these CD4+ Treg lymphocytes express interleukin-2 (IL-2) receptor α chain (CD25) at high levels but not other markers of T cell activation.²⁰ A transcription factor called FoxP3 is essential for the development and function of most regulatory T cells. Mice with mutations in the Foxp3 gene and mice in which this gene has been knocked out develop a multisystem autoimmune disease associated with the absence of CD25+ regulatory T cells.²¹

Another primary function of Treg cells is to inhibit the function of antigen-presenting cells and T effector cells (Teff cells). Regulatory T cells

inhibit the ability of APCs to stimulate T cells. One of these mechanisms relies on CTLA-4, expressed by FoxP3⁺ regulatory cells, and appears to be required for their function.²² CTLA-4 on regulatory cells may bind to B7 molecules on APCs and either block these molecules or eliminate them by internalizing them, thereby reducing the availability of B7 and being unable to provide adequate costimulation for the immune response.²³⁻²⁴

Regulatory T cells are produced through self-antigen recognition in the thymus (sometimes called natural regulatory cells) through self-antigen recognition in peripheral lymphoid organs, called inducible or adaptive regulatory cells. The development and survival of these regulatory T cells require IL-2 and the transcription factor FoxP3.²⁵⁻²⁶ Activated Tregs will suppress the reactivity of autoregressive cells.

Tregs will be activated if CTLA-4 on their surface binds to the CD80/CD86 molecules on the APC surface. CTLA-4:CD80/CD86 binding will increase the expression of IDO (Indoleamine 2, 3-dioxygenase) in APC. An increase in IDO will deplete the availability of tryptophan in the area around the APC. This situation results in the cessation of proliferation of effector T cells and other autoreactive cells. Several other facts show that a lack of tryptophan will cause effector cells to undergo apoptosis. Tregs that have been activated by an antigen not only suppress the cells carrying the antigen, but they will carry out non-specific work on all effector cells, so the use of Tregs in therapy must consider matters related to the importance of effector cell function.²³⁻²⁴

T-helper 17 (Th17) cells

CD4⁺ T cells are essential in initiating immune responses by assisting other cells and assuming various effector functions during immune reactions. Naive CD4⁺ T cells respond to antigenic stimulation by activating, proliferating, and differentiating into effector subsets known as T helpers (Th1), Th2, Th9, Th17, and Th22. These subsets are distinguished by their production of unique cytokines and effector functions.²⁷

Th17 cells have been identified as one of the significant Th cell populations. Like Th1 and Th2 cells, Th17 cells require specific cytokine and transcription factors to differentiate. Th17 cells have an important role in driving the inflammatory process, a direct protective response of the body against foreign pathogens. Those cells can also produce tumor necrosis factor (TNF)- α , IL-6, IL-22, IL-21, and IL-26,²⁸ but as cytokines, these are also produced by other Th cell subsets. The

chemokine and cytokine receptor expression patterns of human Th17 cells have been studied extensively, and it is now generally accepted that they express CCR4, CCR6, and IL-23R but not CXCR3.²⁹⁻³¹

Many studies suggested that Th17 cells are crucial in maintaining mucosal barrier integrity and defending against pathogens. The lack of Th17 cells contributes to chronic immune activation and inflammation, hallmark features of progressive HIV infection. HIV preferentially targets mucosal CD4⁺ T cells, depleting Th17 cells and compromising mucosal immunity.⁸

Treg and Th17 Cells Activity in HIV Pathogenesis

Th17 cells are functionally distinct from Th1 and Th2 cells and are associated with chronic inflammatory diseases and autoimmune disorders. Th17 can enhance host defense against microbial agents and may be essential in maintaining the inflammatory state, especially in gastrointestinal (GI) enterocyte homeostasis in progressive HIV disease. Loss of Th17 cells in HIV infection may result in bacterial translocation from the intestine to the systemic circulation and may lead to immune activation, leading to HIV infection.

Meanwhile, Treg cells can interfere with protective immune responses and control T cell self-reactivity. The influence of Tregs on HIV infection is still unclear. Several research groups have reported that Tregs can explain HIV pathogenesis by altering the function of HIV-specific T cell responses, thereby accelerating viral replication. Other studies have shown that Tregs play a beneficial role by limiting or suppressing immune system activation, which is also one of the main mechanisms in T cell dysfunction and depletion.

Tregs secrete TGF β and IL-10 and require the specific cytokine TGF β and the transcription factor FoxP3 to differentiate. While Th17 cells promote autoimmunity³², Tregs control Th17 cells. Thus, the Th17/Treg ratio is necessary to control immunity mediated by Th17 cells. Some studies found that the frequency of Th17 decreased continuously over time in the peripheral blood of HIV-infected individuals.³³ Changes in the frequency of Th17 cells and the number of CD4⁺ T cells had a strong positive correlation during the progression of HIV-1 infection. These data are consistent with many recent studies showing preferential depletion of Th17 cells from infection with the pathogen simian immunodeficiency virus (SIV) in the gut and HIV in the blood.

Contrary to the decrease in Th17 cells, the frequency of Treg cells was markedly higher in HIV-1-infected patients and increased post-HIV infection. In addition, the frequency of Treg cells was inversely related to the number of CD4+ T cells and positively correlated with viral load. The progressive loss of Th17 and increase in Treg cells in HIV-1-infected individuals, especially those with advanced disease, suggests that a functional Th17/Treg imbalance exists, and the Th17/Treg ratio gradually decreases throughout disease progression.³⁴ This conclusion is supported by recent studies showing that IDO 1 (indoleamine 2, 3-dioxygenase 1)-dependent tryptophan catabolism may be important in controlling the Th17/Treg balance.³⁵ Various studies emphasize that the Th17/Treg ratio plays quite an important role in the pathogenesis of chronic HIV infection.

This Th17/Treg functional imbalance provides a paradigm. It also gives a new target for our understanding of HIV pathogenesis and future considerations regarding the treatment of chronic HIV infection and the development of an HIV vaccine. It is also possible to manipulate Th17 and Treg function to cure immunodeficiency.

Therapeutic Implications

HIV infection affects the human immune system, causing immunodeficiency and immunosuppression, ultimately increasing vulnerability to opportunistic infections and illnesses. Some studies have shown that many immunotherapies can enhance and control the immune system of HIV-infected individuals. Restoring Immune Balance is a potential strategy to rebalance Th17 and Treg cells. Th17/Treg balance is strictly maintained in a healthy state and is essential to preserving the immunological homeostasis of human beings. Antiretroviral therapy (ART), for instance, significantly decreases the incidence and severity of opportunistic diseases and death.³⁶ Mucosal Immunity Restoration is also an alternative strategy to restore Th17 cells, enhance mucosal barrier integrity, and defend against pathogens. Improving mucosal immunity will minimize the impact of HIV on mucosal tissues.

III. CONCLUSION

Understanding the dynamic interplay between Tregs and Th17 cells during HIV infection is essential for unraveling the complexities of immune dysregulation. Therapeutic approaches that target immunological homeostasis and mucosal immunity have the potential to improve clinical outcomes in HIV-positive patients. More

investigation is necessary to fully understand the mechanisms underlying Tregs-Th17 dynamics and convert these discoveries into helpful treatment strategies.
