PREFACE

Assalamu'alaikum wr. wb.,

It is a pleasure to welcome all invited speakers and participants to the 1st International Nursing Conference: Increasing Role of Nurse in the Era of Globalization through Inter-professional Collaboration in the Perspective of Agricultural Nursing held by School of Nursing, Jember University on November 9th, 2014.

The goal of this conference is to bring together academic scientists, researchers, practitioners and scholars to exchange and share their experiences and research results about all aspects of "Nursing Care in the Perspective of Agricultural Nursing". This book contains abstracts from participants who joined oral and poster presentations. Hopefully, the book could provide valuable information to the community.

I express my sincere gratitude to all speakers who have come to Jember to share information and experiences to all of us. My grateful thanks are extended to all participants, to the committee of the conference and those who have helped us so that this event could be held successfully.

Thank you very much.
Wassalamu'alaikum wr. wb.

**ANALYSIS OF HEALTH PROMOTION MODEL
RELATIONSHIP "BEHAVIOR-SPECIFIC AND AFFECT COGNITIONS"
WITH THE VIGILANCE CATASTROPHE FLASH FLOOD FOR
PRIMARY SCHOOL AGE CHILDREN IN PANTI JEMBER**

Latifa Aini S

Lecturer of Nursing Science University of Jember, latifa.aini.s@gmail.com

Abstract

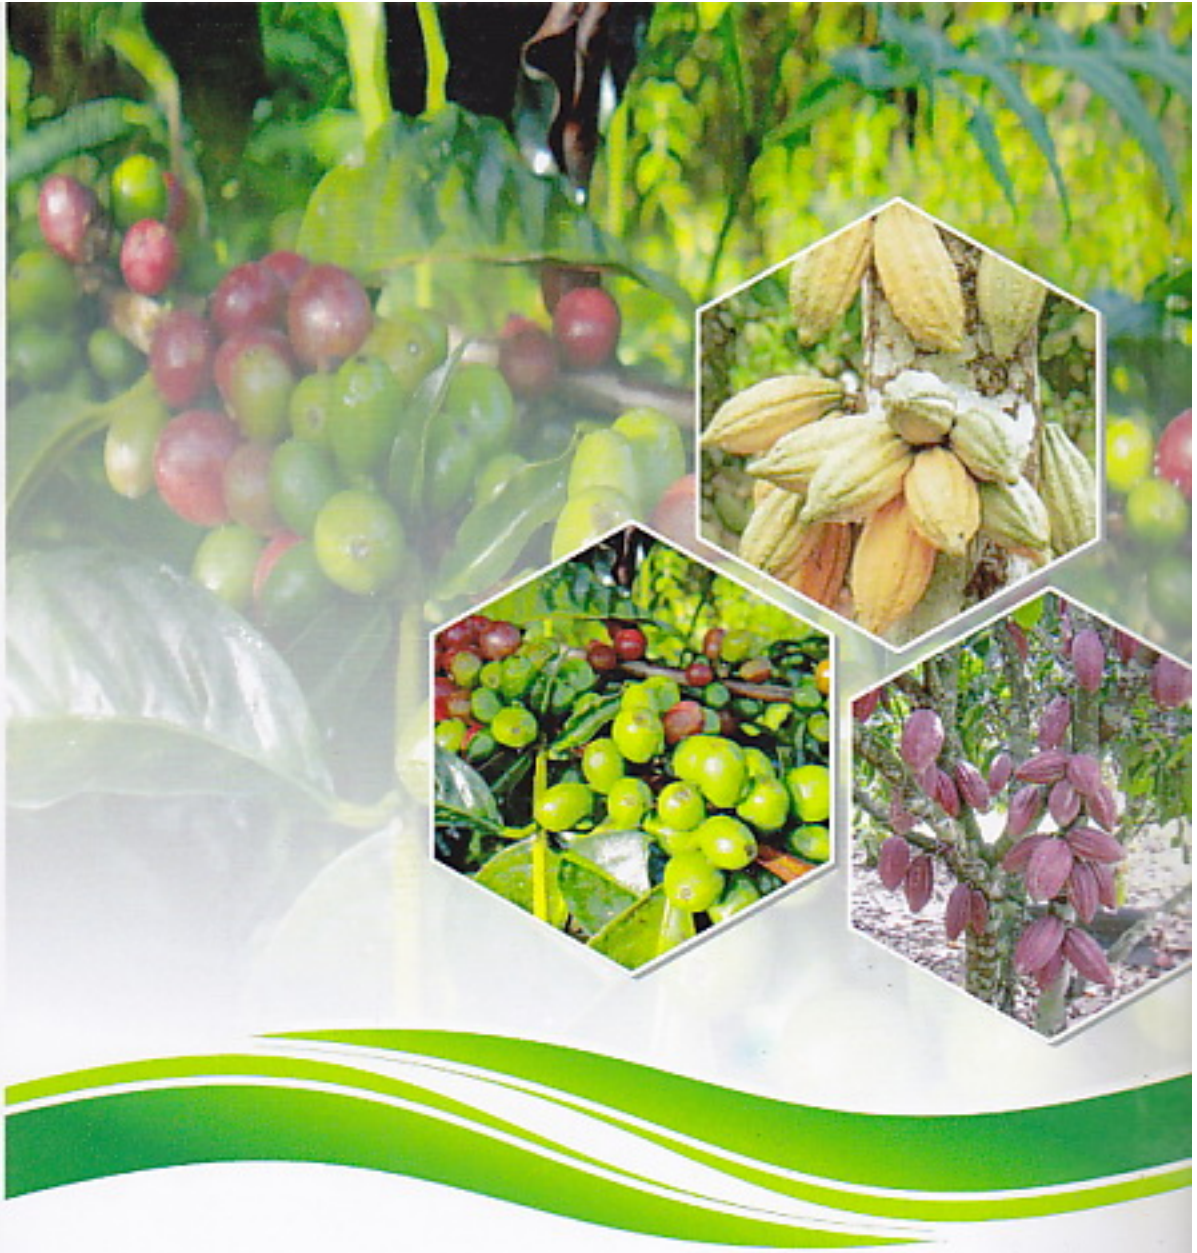

Introduction: Natural disasters flash flood that occurred in 2014 Jember Orphanage Saints loss leaves both physically and psychologically. Children of primary school age is one of the groups in society that have the potential to help raise awareness of natural disasters flash flood through the analysis of the Health Promotion Model "Specific Behavior cognitions and Affect".

Method: Quantitative research with cross sectional approach using a random sample of 220 primary school age children. Test used is the Chi Square test ($\alpha = 0.05$).

Result: The results showed there is relationship between the Health Promotion Model "Specific Behavior cognitions and Affect" with awareness of natural disasters flood with p value 0.00. Health Promotion Model, which describes the action of Perceived benefits, Perceived barriers of action, Perceived self-efficacy, related Activity Affect, Interpersonal influences, and Situational influences.

Discussion: Health Promotion Model explains that the action will be done by the individual, if the individual has the experience and perception in understanding natural disasters flood alert. Experiences and perceptions of primary school age children are Perceived benefits of action, Perceived barriers of action, Perceived self-efficacy, related Activity Affect, Interpersonal influences, and Situational influences. Therefore, to develop the ability to understand the behavior of natural disasters flood vigilance must continue to be done.
