DEDICATION

This thesis is dedicated to the following people:

1. My beloved parents, Muksin and Solhah. Thank you very much for your guidance and your endless love.
2. My beloved little brother and sister, Cahya Dwi and Fazaria Reza. Your supports and help will be always in my mind.
3. The sunshine of my life, N. Hernadianto. Thank you for always being in my side forever and ever.
4. My close friends at 2007 level of English Education Program, Rindu, Rahmat and Tanti.

MOTTO

**Be thankful for what you have; you will end up having more.
If you concentrate on what you do not have; you will never, ever have enough.*)**

ACKNOWLEDGEMENT

First of all, I would like to thank the almighty Allah SWT. Because of His blessing and guidance, I am able to finish the thesis entitled “Improving the Eighth Year Students’ Speaking Ability through Story Games at SMPN 1 Nguling Pasuruan in the 2011/2012 Academic Year”.

I do realize that this thesis would not be finished without the people whom I owe a great deal of support, motivation, and suggestion. I would like to express my deepest appreciation and sincerest thanks to the following people:

1. The Dean of the Faculty of Teacher Training and Education;
2. The Chairperson of the Language and Arts Education Department;
3. The Chairperson of the English Education Program;
4. My academic advisor, Dra. Wiwiek Eko Bindarti, M.Pd.;
5. The first and second consultant, Drs. Sudarsono, M.Pd and Dra. Zakiyah Tasnim, M.A., for their guidance and suggestions in accomplishing this thesis. Their guidance and suggestions are highly appreciated;
6. The principal, the English teacher and the eighth year students of SMP Negeri 1 Nguling Pasuruan in the 2011/2012 academic year who helped me obtain the research data;
7. My beloved parents, brother, sister; and
8. All of my friends of the English Education Program, especially the 2007 level.

Finally, I expect that this thesis will be useful not only for me but also for the readers. However, I do realize that it is still far from being perfect. Any constructive critics and suggestions will be fully appreciated.

Jember, May 2012

SUMMARY

Improving the Eighth Year Students' Speaking Ability through Story Games at SMP Negeri 1 Nguling Pasuruan in the 2011/2012 Academic Year; Nungky Juwita Salindri; 070210491007; 2012; 59 pages; English Education Program Faculty of Teacher Training and Education Jember University.

This Classroom Action Research was intended to improve the eighth grade students' speaking ability through story games at SMP Negeri 1 Nguling Pasuruan in the 2011/2012 academic year. The research subjects were the students of class VIII 1 that were determined purposively by consulting to the eighth grade English teacher. Based on the information from the teacher, this class had the lowest speaking achievement among other six classes of class VIII. The average score of speaking was 63.3 (fair category). It is below the mastery score level of speaking at that school that is 70.

This classroom action research was done in two cycles in which each cycle covered four stages of activities, namely planning the action; implementing the action; observing and evaluating; and analyzing the data and reflecting the action. Each cycle was conducted in two meetings. The data about the students' speaking achievement were collected by administering the speaking test after the actions given. Observation was used to monitor the process of teaching speaking through story games especially "Build a Story" game and the students' active participation in the classroom. The supporting data were collected by interview and documentation.

In cycle I, the results of the speaking test showed that the mean score of the students' achievement test was 68.9 (fair category). Then, there was only 57.1% of the total students could achieve the target score, that was at least ≥ 70 . In other words, the percentage of the students' speaking achievement that got score at least ≥ 70 was below 75%. Then, based on the classroom observation it was revealed that there were only 25 of 35 students (71.4%) who were actively involved in the teaching learning

activities in the first meeting and there were 27 of 35 students (77.1%) who were actively involved in the teaching learning activities in the second meeting. It means that the result of the observation in cycle I had not achieved the requirement of the research because the result of the observation in the first meeting had not achieved the requirement of the research that was at least 75% of the students. It showed that this research result had not fulfilled the criteria of the success of the action. Therefore, the actions in cycle II were conducted in order to improve the students' speaking ability through story games, especially "Build a Story" game.

The actions were continued to the second cycle by revising some necessary aspects. The English teacher and the researcher collaborated in determining the members of the groups. The students were equally grouped based on the result of the speaking test in cycle I and the observation was done by the observer during the actions in cycle 1. Besides, the teacher gave more attention to the groups in which the members didn't get the same opportunities in the discussion and gave chance to the students to ask questions whether or not they had understood the materials. Moreover, the English teacher and the researcher tried to get more interesting stories which were familiar for the students. Some topics were taken from some students' past experiences. It was hoped that the revision could make the students improve their speaking ability.

In the second cycle, the results of speaking test showed improvement. The mean score of the students' speaking achievement test was 73.8 (good category). It was higher than the mean score in cycle I that was 68.9. Then, there was improvement of the students who could achieve the target score required, that was at least 75. There were 27 students or 77.1% of the total students got scores at least ≥ 70 . Regarding the students' active participation in the teaching learning process of speaking, it also improved. Then, based on the classroom observation it was revealed that there were 29 of 35 students (82.9%) who were actively involved in the teaching learning activities in the first meeting and there were 30 of 35 students (85.7%) who were actively involved in the teaching learning activities in the second meeting.

These results indicated that this research had fulfilled the criteria of the success of this action research.

Based on the results, it could be concluded that the teaching of speaking through story games especially “Build a Story” game could improve the students’ speaking ability as well as their active participation in the process of speaking teaching learning. Then, it is suggested that the English teachers to use story games especially “Build a Story” game as an alternative way in teaching speaking to improve the students’ speaking ability.
