Foreword from General Chair EECSI 2018

Foreword General Chair

In the name of Allah, the Most Beneficent, the Most Merciful.

Welcome to the 2018 5th International Conference on Electrical Engineering, Computer Science and Informatics (EECSI 2018) in Malang, Indonesia.

The 5th EECSI 2018 is themed “Toward the Next Generation of Technology“. This conference provides academicians, researchers, professionals, and students from various engineering fields and with cross-disciplinary working or interested in the field of Electrical Engineering, Computer Science, and Informatics to share and to present their works and findings to the world.

I would like to express my highly gratitude to all participants for attending, sharing and presenting your ideas and experiences in this interesting conference. Almost 300 papers had been submitted to EECSI 2018. However, the only high quality papers are selected and accepted to be presented in this event. We are also thankful to all the international committee, international reviewers, and steering committee for their valuable support. I would like to give a praise to all partners in publications and sponsorships for their valuable supports, especially for Ministry of Research and Higher Education (Kemenristekdikti) Indonesia.

Organizing a prestigious conference was incredibly challenging and would have been impossible to be held without outstanding committees. Such that, I would like to extend my sincere appreciation to all organizing committees and volunteers from Universitas Muhammadiyah Malang as a host and all colleagues from Universitas Diponegoro, Universitas Ahmad Dahlan, Universitas Sriwijaya, Universitas Islam Sultan Agung, Universitas Gadjah Mada, Universitas Budi Luhur, Universiti Teknologi Malaysia, and IAES Indonesia Section for providing me with much needed support, advice, and assistance on all aspects of the conference. A special thanks also for IEEE Indonesia Section for their contribution as technical co-sponsorship of the conference. We do hope that this event will encourage the collaboration among us now and in the future.

We wish you all find opportunity to get rewarding technical program, intellectual inspiration, renew friendships and forge innovation, and that everyone enjoys Malang.

Assoc. Prof. DR. Tole Sutikno
General Chair EECSI 2018

Foreword from IAES Indonesia Section

Bismillahirrohmannirrahim,

In the name of Allah Al Mighty, The Most Gracious, The Most Merciful

We are pleased to welcome our colleagues in the International Conference on Electrical Engineering, Computer Science and Informatics (EECSI 2018) in Malang, City of Heritage on October 16-18th, 2018.

It must be said proudly that the EECSI has been rolled out for five times since it was firstly initiated on year 2014 in Yogyakarta. Our colleagues all over the world supporting by many tops universities have successfully organized the conference to become the prestigious international annual event in Indonesia.

A highest appreciation is addressed to The Ministry of Research, Technology and Higher Education (Kemenristekdikti) Republic of Indonesia for a worthy technical and financial support during the conference and special thanks for IEEE Indonesia Section for the technical co-sponsorship for this prominent occasion. We do hope that this event will strengthen the collaboration among us now and in the future.

This year, the achievement in this conference is due to valuable contributions from our colleagues from Universitas Muhammadiyah Malang supporting by Universitas Diponegoro, Universitas Ahmad Dahlan, Universitas Sriwijaya, Universitas Islam Sultan Agung, Universitas Gadjah Mada, Universitas Budi Luhur and Universiti Teknologi Malaysia. I would like to express my sincere gratitude and appreciation for all partners, friends, Organizing committee, reviewers, keynote speakers, and participants who have made this event as great as today.

I would also like to extend my gratitude to Rector of Universitas Muhammadiyah Malang who friendly becomes a main host for this great conference. We optimist many following collaborative works will be carried out among us and all participants.

I hope you all had a nice time at the conference where all of you are able to learn something new, renewed and created new networks and at the same time have some fun in Malang City during the conference and Mount Bromo during the cultural tour.

Thank you.

Assoc. Prof. Mochammad Facta, Ph.D
IAES – Indonesia Chapter

Foreword from Rector of Universitas Muhammadiyah Malang

The advent of the next generation of technology, renown as Technology 4.0, is unavoidably incessant. This so-called technology has offered a new horizon in various aspects of man-beings' lives. To be particular in the fields of electrical engineering, electronics, computer science, computer engineering, and informatics, Technology 4.0 plays its potent role to underpin the future advancement of technology for the coming generations. Scientific forum titled as the 2018 5th International Conference on Electrical Engineering, Computer Science, and Informatics (EECSI 2018) hosted by University of Muhammadiyah Malang in collaboration with a number of universities is the manifestation of continuous effort to aim for the ever-changing technology.

Hereby, I would like to congratulate the Faculty of Engineering, University of Muhammadiyah Malang for their effort in organizing the 2018 5th International Conference on Electrical Engineering, Computer Science, and Informatics (EECSI 2018). I appreciate all co-organizers such as Universitas Diponegoro, Universitas Ahmad Dahlan, Universitas Sriwijaya, Universitas Islam Sultan Agung, Universitas Budi Luhur, and Universiti Teknologi Malaysia for their support in this mutual collaboration. Without the full and valuable supports from the international committee, international reviewers, and steering committee, this international conference remains a detached discourse without high commitment to conduct.

The expression of my high gratitude is devoted to the Ministry of Research, Technology, and Higher Education (Kemenristekdikti) Republic of Indonesia, IEEE Indonesia Section, and IAES Indonesia Section for their support to this event as the sponsors and technical co-sponsorship, respectively. Expectantly, this would be the initial and continual collaboration in the future.

To all speakers, presenters, and participants, thank you for participating and welcome to this conference. The success of this conference owes so much on your participation and contribution in promoting the knowledge, information, and robust creativity. To end with, this conference expectedly becomes an arena to build mutual ties among the academicians, researchers, industries, and society.

All the best to EECSI 2018

Dr. H. Fauzan, M.Pd.

Rector

Universitas Muhammadiyah Malang - Indonesia

ORGANIZING COMMITTEE OF EECSI 2018 CONFERENCE

Steering Committee

- Adam Skorek, IEEE MGA Awards and Recognition Chair (R7) Trois-Rivières, QC, Canada
- Pekik Argo Dahono, IEEE Indonesia Chapters Chair (EdSoc/EDS/PELS/SPS)
- Mochamad Ashari, Telkom University, Bandung, Indonesia
- Tumiran, Universitas Gadjah Mada, Yogyakarta, Indonesia
- Hermawan, Universitas Diponegoro, Semarang, Indonesia
- Zainudin Nawawi, Universitas Sriwijaya, Palembang, Indonesia
- Rahmat Budiarto, Albaha University, Baha, Saudi Arabia
- Sri Artini Dwi Prasetyowati, Universitas Islam Sultan Agung, Semarang, Indonesia
- Kartika Firdausy, Universitas Ahmad Dahlan, Yogyakarta, Indonesia
- Siti Nurmaini, Universitas Sriwijaya, Palembang, Indonesia
- Ahmad Mubin, Universitas Muhammadiyah Malang, Indonesia

General Chair

- Tole Sutikno, IAES Indonesia

Finance Chairs and Treasurer

- Wiwiek Fatmawati, Universitas Islam Sultan Agung, Semarang, Indonesia
- Lailis Syafa'ah, Universitas Muhammadiyah Malang, Indonesia
- Lina Handayani, Universitas Ahmad Dahlan, Yogyakarta, Indonesia

Program Chairs

- Deris Stiawan, Universitas Sriwijaya, Palembang, Indonesia
- Mochammad Facta, Universitas Diponegoro, Semarang, Indonesia
- Agus Eko Minarno, Universitas Muhammadiyah Malang, Indonesia
- Machmud Effendy, Universitas Muhammadiyah Malang, Indonesia
- Fauzi Sumadi, Universitas Muhammadiyah Malang, Indonesia
- Christian Sri Kusuma Aditya, Universitas Muhammadiyah Malang, Indonesia

General Co-Chair

- Zulfatman, Universitas Muhammadiyah Malang, Indonesia
- Anton Yudhana, Universitas Ahmad Dahlan, Yogyakarta, Indonesia

Publication Chairs

- Munawar A. Riyadi, Universitas Diponegoro, Semarang, Indonesia
- Balza Achmad, Universitas Gadjah Mada, Yogyakarta, Indonesia
- Yuda Munarko, Universitas Muhammadiyah Malang, Indonesia
- Wahyu A. Kusuma, Universitas Muhammadiyah Malang, Indonesia

Publicity Chairs

- Imam Much Ibnu Subroto, Universitas Islam Sultan Agung, Semarang, Indonesia
- Maskur, Universitas Muhammadiyah Malang, Indonesia
- Son Ali Akbar, Universitas Ahmad Dahlan, Yogyakarta, Indonesia
- Sam F. Chaerul, Universitas Islam Sultan Agung, Semarang, Indonesia
- Ahmad Heryanto, Universitas Sriwijaya, Palembang, Indonesia

Public Relations Chairs

- Aina Musdholifah, Universitas Gadjah Mada, Yogyakarta, Indonesia
- Amrul Faruq, Universitas Muhammadiyah Malang, Indonesia
- Reza Firsandaya Malik, Universitas Sriwijaya, Palembang, Indonesia
- Muhammad Syafrullah, Universitas Budi Luhur, Jakarta, Indonesia
- Muhammad Qomaruddin, Universitas Islam Sultan Agung, Semarang, Indonesia
- Krisna Adiyarta, Universitas Budi Luhur, Jakarta, Indonesia

Technical Program Chairs

- Munawar A. Riyadi, Universitas Diponegoro, Semarang, Indonesia
- Balza Achmad, Universitas Gadjah Mada, Yogyakarta, Indonesia
- Deris Stiawan, Universitas Sriwijaya, Palembang, Indonesia
- Arief Marwanto, Universitas Islam Sultan Agung, Semarang, Indonesia
- Mudrik Alaydrus, Universitas Mercu Buana Jakarta, Indonesia
- Teddy Mantoro, Sampoerna University, Jakarta, Indonesia
- Sidiq Syamsul Hidayat, Politeknik Negeri Semarang, Semarang, Indonesia

Technical Program Members

- Syed Mohsen Naqvi, Newcastle University, UK
- Peter Balazs, Austrian Academy of Sciences, Austria
- Mohammed Alghamdi, Al-Baha University
- Marco Baldi, Università Politecnica delle Marche
- Ihsen Ben Mbarek, National Engineering School of Tunis
- Suryadip Chakraborty, Johnson C. Smith University
- July Díaz, Universidad Distrital Francisco José de Caldas
- Saurabh Dixit, Babu Banarsi Das University, Lucknow
- Wajeb Gharibi, Jazan University, KSA
- Visvasuresh Victor Govindaswamy, Concordia University
- Muhammad Abu Bakar Sidik, Universitas Sriwijaya, Indonesia
- Saied Abd El-atty, Menoufia University-Faculty of Electronic Engineering
- K. M. Mahtab Hossain, University of Greenwich
- Ahmed Mobashsher, The University of Queensland
- Ratan Kumar Mondal, Queensland University of Technology
- Kun-Da Wu, HTC Corporation
- Quanxin Zhao, University of Electronic Science and Technology of China
- Tresna Dewi, Polytechnic of Sriwijaya, Indonesia
- David Luengo, Universidad Politecnica de Madrid, Spain
- Maria Chiara Caschera, Consiglio Nazionale delle Ricerche, Rome, Italy
- Amir Nakib, Universite de Paris Est Creteil, Vitry-sur-Seine, France
- Pujianto Yugopuspito, Universitas Pelita Harapan, Indonesia
- Jens Klare, Fraunhofer-Gesellschaft, Munich, Germany
- Ramy Atawia, Queen's University, Kingston, Kingston, Canada
- Maxime Leclerc, Thales Research & Technology (TRT), Canada
- Sanjoy Debbarma, National Institute of Technology Meghalaya, Shillong, India
- Bo Kong, PLA University of Science and Technology, Nanjing, China
- Noha El-Ganainy, Arab Academy for Science & Technology and Maritime Transport, Egypt

- Rodrigo Montufar-Chaveznava, Facultad de Ingeniería, Universidad Nacional Autónoma de México
- Michel Owayjan, American University of Science & Technology
- Ljiljana Šeric, University of Split, Croatia
- Hengky Susanto, Hong Kong University of Science and Technology
- Khoirul Anwar, Telkom University, Indonesia
- Muhammad Raza, HUST Wuhan, China
- Xiaojun Li, Texas A&M University, United States
- Marco Guazzone, University of Piemonte Orientale, Italy
- Indra Riyanto, Universitas Budi Luhur, Indonesia

Local Arrangement, Exhibits & Registration Chairs

- Ermanu Azizul Hakim, Universitas Muhammadiyah Malang, Indonesia
- M. Irfan, Universitas Muhammadiyah Malang, Indonesia
- Galih Wasis Wicaksono, Universitas Muhammadiyah Malang, Indonesia
- Lailatul Husniah, Universitas Muhammadiyah Malang, Indonesia
- Ilham Pakaya, Universitas Muhammadiyah Malang, Indonesia
- Novendra Setiawan, Universitas Muhammadiyah Malang, Indonesia

International Committee

- Lech M. Grzesiak, Warsaw University of Technology, Poland
- Leo P. Ligthart, Delft University of Technology, Netherlands
- Malaoui Abdessamad, University of Beni Mellal
- Muhammad Ishtiaq Ahmad, Beijing Institute of Technology
- Diego Arcos-Aviles, Universidad de las Fuerzas Armadas ESPE
- Eduard Babulak, Fort Hays State University
- Alper Bereketli, ASELSAN Inc.
- Tugçe Bilen, Istanbul Technical University
- Yue Cao, Northumbria University

Foreword From Rector of Universitas Muhammadiyah Malang	vi
ORGANIZING COMMITTEE OF EECSI 2018 CONFERENCE	vii

KEYNOTE

KN-1 : Optimization of Modified Sliding Mode Control for an Electro-Hydraulic Actuator System with Mismatched Disturbance	1
---	---

TRACK-1 : Biomedical Engineering and Bioinformatics

T1-1 : OCT for non-destructive examination of the internal biological structures of mosquito specimen	7
T1-2 : Analysis of EMG based Arm Movement Sequence using Mean and Median Frequency	11
T1-3 : Implementation of Myo Armband on Mobile Application for Post-stroke Patient Hand Rehabilitation	16
T1-4 : Development of Embedded System for Centralized Insomnia System	22
T1-5 : Performance Analysis of Color Cascading Framework on Two Different Classifiers in Malaria Detection	27
T1-6 : Monitoring Walking Devices For Calorie Balance In Patients With Medical Rehabilitation Needs	31

TRACK-2 : Computer Science and Applications

T2-1 : E-Government Maturity Model to Support System Dynamics in Public Policymaking	35
T2-2 : Comparative Analysis of Forensic Software on Android-based Blackberry Messenger using NIJ Framework	43
T2-3 : Semi-reactive Switch Based Proxy ARP in SDN	49
T2-4 : Improvement of Cluster Importance Algorithm with Sentence Position for News Summarization	54
T2-5 : Comparison Between A* And Obstacle Tracing Pathfinding In Gridless Isometric Game	60
T2-6 : Automatic Game World Generation for Platformer Games Using Genetic Algorithm	66
T2-7 : Middleware for Network Interoperability in IoT	70
T2-8 : Face RGB-D Data Acquisition System Architecture for 3D Face Identification Technology	74
T2-9 : Feature Expansion for Sentiment Analysis in Twitter	80
T2-10 : Web-based Campus Virtual Tour Application using ORB Image Stitching	85
T2-11 : Automatic User-Video Metrics Creations From Emotion Detection	89
T2-12 : Real Time SIBI Sign Language Recognition Based on K-Nearest Neighbor	95
T2-13 : Artificial Neural Network Parameter Tuning Framework For Heart Disease Classification	100
T2-14 : Winter Exponential Smoothing: Sales Forecasting on Purnama Jati Souvenirs Center	106

T2-15 : Analysis and Design of Decision Support System Dashboard for Predicting Student Graduation Time	110
T2-16 : Sentiment Analysis Using Support Vector Machine Algorithm	116
T2-17 : Group Formation Using Multi Objectives Ant Colony System for Collaborative Learning	122
T2-18 : Smart Traffic Light based on IoT and mBaaS using High Priority Vehicles Method	129
T2-19 : Correlation Between Bruto Domestic Products (Gdp) With Duty Schools	134
T2-20 : Mobile Learning: Utilization of Media to Increase Student Learning Outcomes	138
T2-21 : Study of the Android and ANN-based Upper-arm Mouse	144
T2-22 : FVEC feature and Machine Learning Approach for Indonesian Opinion Mining on YouTube Comments	150
T2-23 : Clustering human perception of environment impact using Rough Set Theory	156
T2-24 : E-Government Service Evaluation of Batu City Health Dept.using e-Govqual Approach and IPA Analysis	160
T2-25 : Implementation of Obfuscation Technique on PHP Source Code	164
 TRACK-3 : Electrical Power Engineering	
T3-1 : Power Demand Forecasting Considering Actual Peak Load Periods Using Artificial Neural Network	169
T3-2 : A New Algorithm for Designing the Parameter of Damped-Type Double Tuned Filter	175
T3-3 : Comparison of LFC Optimization on Micro-hydro using PID, CES, and SMES based Firefly Algorithm	180
T3-4 : Optimal Power Flow using Fuzzy-Firefly Algorithm	186
T3-5 : Low-Frequency Oscillation Mitigation using an Optimal Coordination of CES and PSS based on BA	192
T3-6 : Computer Aided Model for an Off-grid Photovoltaic System using Batteries Only	198
T3-7 : Computer Aided Model for a Low Voltage Varistor with Increased Thermal Stability	202
T3-8 : Smart Frequency Control using Coordinated RFB and TCPS based on Firefly Algorithm	207
T3-9 : Economic Feasibility Study of Rooftop Grid Connected PV System for Peak Load Reduction	213
T3-10 : Automatic Switching Algorithm for Photovoltaic Power Generation System	218
T3-11 : Rotor Speed Control Maximum Power Point Tracking for Small Wind Turbine	225
T3-12 : Stator Flux Oriented Control of Three-Phase Induction Motor with Improved Decoupling Scheme	231
T3-13 : Sensorless PMSM Control using Fifth Order EKF in Electric Vehicle Application	236
T3-14 : Sizing Optimization And Operational Strategy Of HRES (PV-WT) Using Differential Evolution Algorithm	242
T3-15 : Indoor Agriculture: Measurement of The Intensity of LED for Optimum Photosynthetic Recovery	249
T3-16 : Quasi Z-Source Inverter as MPPT on Renewable Energy using Grey Wolf Technique	255

T3-17 : Analysis of Waveform of Partial Discharge in Air Insulation Measured by RC Detector	260
T3-18 : Application of Ultra-Wideband Double Layer Printed Antenna for Partial Discharge Detection	266
T3-19 : Reliability Analysis of Randu Garut 3 Distribution System Using Section Technique Method	272
T3-20 : Combined Computational Intelligence Approach for the Power System Optimization Problem	278
T3-21 : Partial Discharge and Breakdown Strength of Plasma Treated Nanosilica/LDPE Nanocomposites	284
T3-22 : PSS Design Based on Fuzzy Controller with Particle Swarm Optimization Tuning	288
T3-23 : A Design of Coreless Permanent Magnet Axial Flux Generator for Low Speed Wind Turbine	292
T3-24 : Design of Hybrid System Power Management Based Operational Control System to Meet Load Demand	297
T3-25 : On The Use of Hilbert Transform Method for Enveloping Partial Discharge Signal	303
T3-26 : Circuit Simulation for Wind Power Maximum Power Point Tracking with Four Switch Buck Boost Converter	308
T3-27 : Modulation Strategies for Indirect Matrix Converter: Complexity, Quality and Performance	312
T3-28 : Review on Adjustable Speed Drive Techniques of Matrix Converter Fed Three-Phase Induction Machine	316
T3-29 : A Survey on Topologies and Controls of Z-Source Matrix Converter	322
 TRACK-4 : Electronics and Instrumentation	
T4-1 : High Frequency Multiplier by cascading diode with high order bandpass amplifier multiple times	326
T4-2 : Bioelectrical measurement for sugar recovery of sugarcane prediction using artificial neural network	334
T4-3 : Implementation of MEMS Accelerometer for Velocity-based Seismic Sensor	339
T4-4 : Monitoring The Usage of Marine Fuel Oil Aboard Ketapang Gilimanuk Ship	345
T4-5 : Design of Low Noise Micro Liter Syringe Pump for Quartz Crystal Microbalance Sensor	349
 TRACK-5 : Information Systems and Technologies	
T5-1 : Appropriate Sets of Criteria for Innovation Adoption of IS Security in Organizations	354
T5-2 : Self-Efficacy a Critical Factor of Information System: An Investigation using DeLone McLean	360
T5-3 : Improvement of Information Technology Infrastructure in Higher Education using IT Balanced Scorecard	365
T5-4 : A Conceptual Framework of Cloud-Based Mobile-Retail Application for Textile Cyberpreneurs	371
T5-5 : Implementation of Winnowing Algorithm for Document Plagiarism Detection	377
T5-6 : Shortest Route at Dynamic Location with Node Combination-Dijkstra Algorithm	383
T5-7 : Analysis of Consumer Confidence on Mobile Commerce in Indonesia	388

T5-8 : Social Media and User Performance in Knowledge Sharing	393
T5-9 : Learning Motivation increased due to a Relaxed Assessment in a Competitive-Learning Environment	399
T5-10 : Development of Mobile Based Educational Game as Learning Media for Basic Programming in VHS	403
T5-11 : Incident and Service Request Management for Academic Information System based on COBIT	408
T5-12 : Applying IT Services Business Relationship Management on Security Outsource Company	413
T5-13 : Implementation of the Culinary Recommendation System Using Sentiment Analysis and SAW in Bengkulu	419
T5-14 : Success Factors of HRIS: A Case of Ministry of State-owned Enterprise	424
T5-15 : Factors Affecting Users' Purchase Intention and Attitudes towards Mobile Advertising	429
T5-16 : Analysis of Electronic Medical Record Reception using Expanded Technology Acceptance Model	435
T5-17 : Implementation Strategy of Knowledge Management System: A Case of Air Drilling Associates	440
T5-18 : The Utilization of Ontology to Support The Results of Association Rule Apriori	446
T5-19 : Determination of Router Location for Optimizing Computer Network Using Dominating Set Methods	452
T5-20 : Evaluating The Semantic Mapping	458
T5-21 : The Role of Social User and Social Feature on Recommendation Acceptance in Instagram in Indonesia	464
T5-22 : User Experience Analysis of The Users Babacucu.Com	471
T5-23 : A Measurement Framework for Analyze The Influence of Service Quality and Website Quality on User Sat	477
T5-24 : Quantitative Strategic Planning Matrix Analysis On The Implementation Of Second Screen Technology	483
T5-25 : Investment Analysis of Smart Connected Motorbike in Machine to Machine Application in Indonesia	488
T5-26 : Efficiency and Reliability Performance's of the Bioinformatics Resource Portal	493
T5-27 : ISO/IEC 9126 Quality Model for Evaluation of Student Academic Portal	499
T5-28 : Measurement of IS/IT Investment on the Implementation of ERP and the Effect on company productivity	505
T5-29 : Analysis on Customer Satisfaction Dimensions in P2P Accommodation using LDA: A Case Study of Airbnb	511
T5-30 : Individual Factors As Antecedents of Mobile Payment Usage	517
T5-31 : Determine supporting features for mobile application of NUSANTARA	522
T5-32 : Knowledge Management Maturity Assessment in Air Drilling Associates using G-KMMM	528
T5-33 : Measuring Knowledge Management Readiness of Indonesia Ministry of Trade	534
T5-34 : Personal Extreme Programming with MoSCoW Prioritization for Developing Library Information System	540

TRACK-6 : Networks and Telecommunication Systems

T6-1 : ML-Optimized Beam-based Radio Coverage Processing in IEEE 802.11 WLAN Networks	545
T6-2 : Single-Tone Doppler Radar System for Human Respiratory Monitoring	552
T6-3 : Dual Frequency Continuous Wave Radar for Small Displacement Detection	557
T6-4 : A New Method for Minimizing the Unnecessary Handover in High-Speed Scenario	561
T6-5 : Automate Snort Rule For Xss Detection With Honeypot	565
T6-6 : Substrate Integrated Waveguide Bandpass Filter with Complementary Split Ring Resonator at 2.45 GHz	570
T6-7 : UUID Beacon Advertisements For Lecture Schedule Information	574
T6-8 : Comparative Performance Analysis of Linear Precoding in Downlink Multi-user MIMO	581
T6-9 : Application of LoRa WAN Sensor and IoT for Environmental Monitoring in Riau Province Indonesia	585
T6-10 : Co-channel Interference Monitoring based on Cognitive Radio Node Station	590
T6-11 : Simulation of Mobile LoRa Gateway for Smart Electricity Meter	596
T6-12 : Rain Attenuation Statistics over 5G Millimetre Wave Links in Malaysia	602
TRACK-7 : Robotics, Control and Automation	
T7-1 : Fuzzy Logic Controller Design for Leader-Follower Robot Navigation	606
T7-2 : Arm Robot Manipulator Design and Control for Trajectory Tracking; a Review	612
T7-3 : Vibration Control of Magnetorheological Elastomer Beam Sandwich	618
T7-4 : Magnetorheological Elastomer Stiffness Control for Tunable Vibration Isolator	622
T7-5 : Improving a Wall-Following Robot Performance with a PID-Genetic Algorithm Controller	626
T7-6 : A Review of Solar Tracker Control Strategies	631
T7-7 : Robust and Accurate Positioning Control of Solar Panel System Tracking based Sun Position Image	636
T7-8 : Robust Adaptive Sliding Mode Control Design with Genetic Algorithm for Brushless DC Motor	642
T7-9 : Active Fault Tolerance Control for Sensor Fault Problem in Wind Turbine Using SMO with LMI Approach	648
TRACK-8 : Signal, Image and Video Processing	
T8-1 : Measurement of Thermal Expansion Coefficient on Electric Cable Using X-Ray Digital Microradiography	653
T8-2 : A Relative Rotation between Two Overlapping UAV's Images	658
T8-3 : Re-Ranking Image Retrieval on Multi Texton Co-Occurrence Descriptor Using K-Nearest Neighbor	664
T8-4 : Human Detection using Aggregate Channel Features with Kalman Filtering Image Processing	669
T8-5 : Automatic Estimation of Human Weight From Body Silhouette Using Multiple Linear Regression	675
T8-6 : Variance and Symmetrical-based Approach for Optimal Alignment of 3D Model	679
T8-7 : The Recognition Of Semaphore Letter Code Using Haar Wavelet And Euclidean Function	685

T8-8 : Adventure Game Show:Audience Involvement, Destination Image and Audience Behavior	690
T8-9 : Visual Emotion Recognition Using ResNet	696
T8-10 : A Feature-Based Fragile Watermarking of Color Image for Secure E-Government Restoration	702

TRACK-9 : Soft Computing and Intelligent System

T9-1 : Aspect Based Sentiment Analysis approach with CNN	707
T9-2 : Optimal ANFIS Model for Forecasting System Using Different FIS	713
T9-3 : Automated Diagnosis System of Diabetic Retinopathy Using GLCM Method and SVM Classifier	719
T9-4 : Development of Discrete-Cockroach Algorithm (DCA) for Feature Selection Optimization	726
T9-5 : Narrow Window Feature Extraction for EEG-Motor Imagery Classification using k-NN and Voting Scheme	732
T9-6 : Emotion Recognition using Fisher Face-based Viola-Jones Algorithm	738
T9-7 : IDenet: Inception-Based Deep Convolutional Neural Network for Crowd Counting Estimation	743
T9-8 : Multispectral Imaging and Convolutional Neural Network for Photosynthetic Pigments Prediction	749
T9-9 : Application for the diagnosis of pneumonia based on Pneumonia Severity Index (PSI) values	755
T9-10 : Impact of Matrix Factorization and Regularization Hyperparameter on a Recommender System for Movies	761
T9-11 : Object Detection of Omnidirectional Vision Using PSO-Neural Network for Soccer Robot	765
T9-12 : DSS Scheme Using Forward Chaining-Simple Multi Attribute Rating Technique For Cocoa Beans Selection	770
T9-13 : CountNet: End to End Deep Learning for Crowd Counting	776
T9-14 : Sentiment Analysis Based on Appraisal Theory for Assessing Incumbent Electability	781
T9-15 : Robust Principal Component Analysis for Feature Extraction of Fire Detection System	787
T9-16 : Indonesian Id Card Recognition using Convolutional Neural Networks	791
T9-17 : Sarcasm Detection on Indonesian Twitter Feeds	795

Abstract— Forecasting is the process of making predictions of the future based on past and present data and most commonly by analysis of trends. In sales area, an accurate sales forecasting system will help the company to improve the customers' satisfaction, reduce destruction of products, increase sales revenue and make production plan efficiently. Purnama Jati is a typical Jember souvenir place like "prol tape", "pia tape", "brownies tape" and so forth. Every day, sales on every outlet is uncertain so Purnama Jati repeatedly send to the outlets if the stock has run out. This research will focus on "prol tape" cake, "pia tape" cake product as the research object. In this research we will use winter exponential smoothing as a forecasting method due to suitable character with the case.

Keywords: forecasting, sales, purnama jati

I. INTRODUCTION

Forecasting is the process of making predictions of the future based on past and present data and most commonly by analysis of trends[1]. A commonplace example might be estimation of some variable of interest at some specified future date. In sales area, an accurate sales forecasting system will help the company to improve the customers' satisfaction, reduce destruction of products, increase sales revenue and make production plan efficiently[2].

Purnama Jati is one of famous souvenir center in the city. Purnama Jati is a typical Jember souvenir place like "prol tape", "pia tape", "brownies tape" and so forth. Almost all Purnama Jati products are "tape" based. "Tape" is a snack generated from the fermentation process of carbohydrate foods (cassava) as the substrate by yeast. Purnama Jati produces several products every day such as prol tape and pia tape because these two products are the best selling in the market. Then the products will distribute to all outlets. Every day, sales on every outlet is uncertain, so Purnama Jati repeatedly send to the outlets if the stock has run out. As a result, in a day Purnama Jati can perform several times production. Repeated production certainly waste

time and money. This research will focus on "prol tape" cake, "pia tape" cake product as the research object.

This research was conducted to produce the correct forecasting with case study at Purnama Jati souvenir center. In this case, we realize that there is a need of information. An information that figure the amount of "how much stock that they need?". The stock is related with the question "how much the next product sold out?". Based on this need, in this research we will do forecasting for the product sales.

In this research we will use winter exponential smoothing as a forecasting method. We will try to forecast sales for the next day. By doing the forecasting, we will figure out how accurate are the method implementation to the Purnama Jati sales data pattern by calculating the percentage error.

II. METHODS

Sales data pattern on Purnama Jati are stationary (Fig.1), trend (Fig.2) and seasonal patterns (Fig.3). The stationary data is closely related to the statistical habits of data at a given time and this is often characterized by a constant probability distribution over time[3].

Fig. 1. Stationary data pattern

Fig. 2. Trend data pattern

Fig. 3. Seasonal data pattern

Stationary data moves on average data. Data may experience a gradual shift or a relatively higher or lower movement over a longer period of time. Data with these habits is called trend patterned data. Trend data is usually the result of long-term factors such as an increase or decrease in a particular character[4]. Seasonal data can be seen from the existence of repeating patterns in a row in a certain period[5]. Patterns formed by seasonal data can be a significant decrease and increase and fluctuate high.

A. Winter Exponential Smoothing

Winter Exponential Smoothing(WES) method is used for data patterns with movements that change following the season or trend[6]. This method is one of the popular methods used for seasonal patterned data. In addition to using the level / stationary factor and Winter method trends also use seasonal factors for each season[7]. Amrit Pal Singh, et al.[8] on their research comparing winter exponential smoothing with Moving Average, Single Exponential Smoothing, and Double Exponential Smoothing. The case studied is a shoe company where there is often a spike in demand or unpredictable demand. And the conclusion of this study after comparing the 4 methods found that the Winter Exponential Smoothing method is suitable for data on case studies. In the method proposed by this winter, it is based on 3 (three) refinement parameters[6], i.e one for element, one for trend, and one for seasonal.

$$A_t = \frac{\alpha Y_t}{S_{t-L}} + (1-\alpha) (A_{t-1} + T_{t-1}) \tag{1}$$

$$T_t = \beta (A_t - A_{t-1}) + (1-\beta) T_{t-1} \tag{2}$$

$$S_t = \frac{\gamma Y_t}{A_t} + (1-\gamma) S_{t-L} \tag{3}$$

$$F_{t+p} = (A_t + pY_t) S_{t-L+p} \tag{4}$$

A_t = Smoothing Value

α = Smoothing Constant ($0 < \alpha < 1$)

Y_t = Actual value in t period

β = Smoothing constant for trend estimation ($0 < \beta < 1$)

T_t = Trend estimation

γ = Smoothing constant for seasonal ($0 < \gamma < 1$)

S_t = Seasonal estimates measured as indexes

L = Long season

p = Number of periods to forecast

F_{t+p} = Forecasting results for p period

B. Mean Absolute Percentage Error

Mean Absolute Percentage Error (MAPE) is a calculation to measure the accuracy of the results of a forecasting method[9]. This method calculates the average absolute value of the percentage original data error with the data forecasting result[10].

$$MAPE = \frac{\sum |(\frac{E_t}{Y_t})| * 100}{n} \tag{5}$$

E_t = Error Absolute Value

Y_t = Actual value

n = Amount of data

III. RESULTS AND DISCUSSION

MAPE value able to reflects accuracy level of a forecast. It is said to have very good accuracy if the MAPE value is less than or equal to 10%, has good accuracy if less than or equal to 20%, can be quite accurate if less than or equal to 30% and said less accurate if more than 30%[11].

In this research the forecasting calculation based on last 7 days data. WES method requires the parameter of number of seasons for each calculation, in this study the number of seasons used is 7 because the data provided is the daily data in one month. The calculation of forecasting using the WES Method required 3 constants i.e α , β , and γ . In the determination of the value of the constant must consider the constant value that has the smallest MAPE results.

The constants α , β , and γ have the provision that $0 \leq \alpha \leq 1$, $0 \leq \beta \leq 1$, and $0 \leq \gamma \leq 1$. And obtained the value of α , β , and γ with the smallest MAPE value for 31 days for “Prol Tape Besar” product is $\alpha = 0.069$, $\beta = 0.78$ dan $\gamma = 0.01$, for “Prol Tape Kecil” products are $\alpha = 0.23$, $\beta = 0.15$ and $\gamma = 0.01$ and for “Pia Tape” is $\alpha = 0.03$, $\beta = 0.99$ and $\gamma = 0.01$. According to sales forecasting MAPE from Table 1, 2 and 3 MAPE value is above 20% and below 30%.

		Mean	29

Based on the forecasting result of 3 products Purnama Jati (Prol Tape Besar, Prol Tape Kecil and Pia Tape) in October 2016, the WES implementation is quite accurate. Can be seen in Tables 1, 2 and 3, MAPE values of three products, Prol Tape Besar: 24%, Prol Tape Kecil : 29%, and Pia Tape: 29%.

However, there are some data whose error value is greater than 30% and the forecasting results for the data are said to be inaccurate. This happens because of a spike in data changes that are too high and do not match the pattern. Thus causing chaos on forecasting calculations. Data changes occur because of things that can not be determined. In this case, we analyse deeper on the field. To figure out what happened. And we found out that the possibility of data changes occurs due to holiday outlets or due to declining sales.

IV. CONCLUSION

It can be inferred that implementation of WES methods for this case (daily data) is quite accurate. It is indicated by the results of MAPE calculations on all product categories between 20%-30%. This happens because there are some data whose error value is greater than 30% and the forecasting results for the data are said to be inaccurate. Another problem is the limitation from this research is data availability. Purnama Jati only provides data in one month. The data obtained in this study is too small. It is highly recommended to use more complete data. By using more complete data it is possible to produce more accurate forecasting results.

However, the decision to use WES as forecasting method in this case is suitable with the case character (stationary, seasonal and trend data patterns). It is compared with Single Exponential Smoothing that just accommodate stationary data and Double Exponential Smoothing for stationary and trend data pattern.
